

Workshop 3.1.

Title: The MOOC potential and how to collaborate on a botany MOOC project?

Speaker : Audrey TOCCO

Description :

Based on its experience with the French-speaking MOOC Botanique "Introduction on plant recognition" (more than 83,000 registrants), Tela Botanica invites you to participate in a workshop (1hour) to discover the potential of a MOOC (Massive Open Online Course) for the general public and students in the field of botany. This time will be the opportunity to build together a new MOOC project on the use of plants and botanical families. The workshop will be organized in two parts: a presentation of the MOOC experience by Tela Botanica and a participative workshop to share your opinion on the MOOC projects under development and to invite you to get involved.
