4th Mediterranean Plant Conservation Week. Valencia, Spain. October, 2023. Aurelio Penya, Doina Bird

50th Anniversary of *The secret Life of Plants*

Not just plants.

- the aura
- psychophysics
- the orgone
- radionics,
- kirlian photography
- magnetism/magnetotropism
- bioelectricity
- dowsing
- the history of science

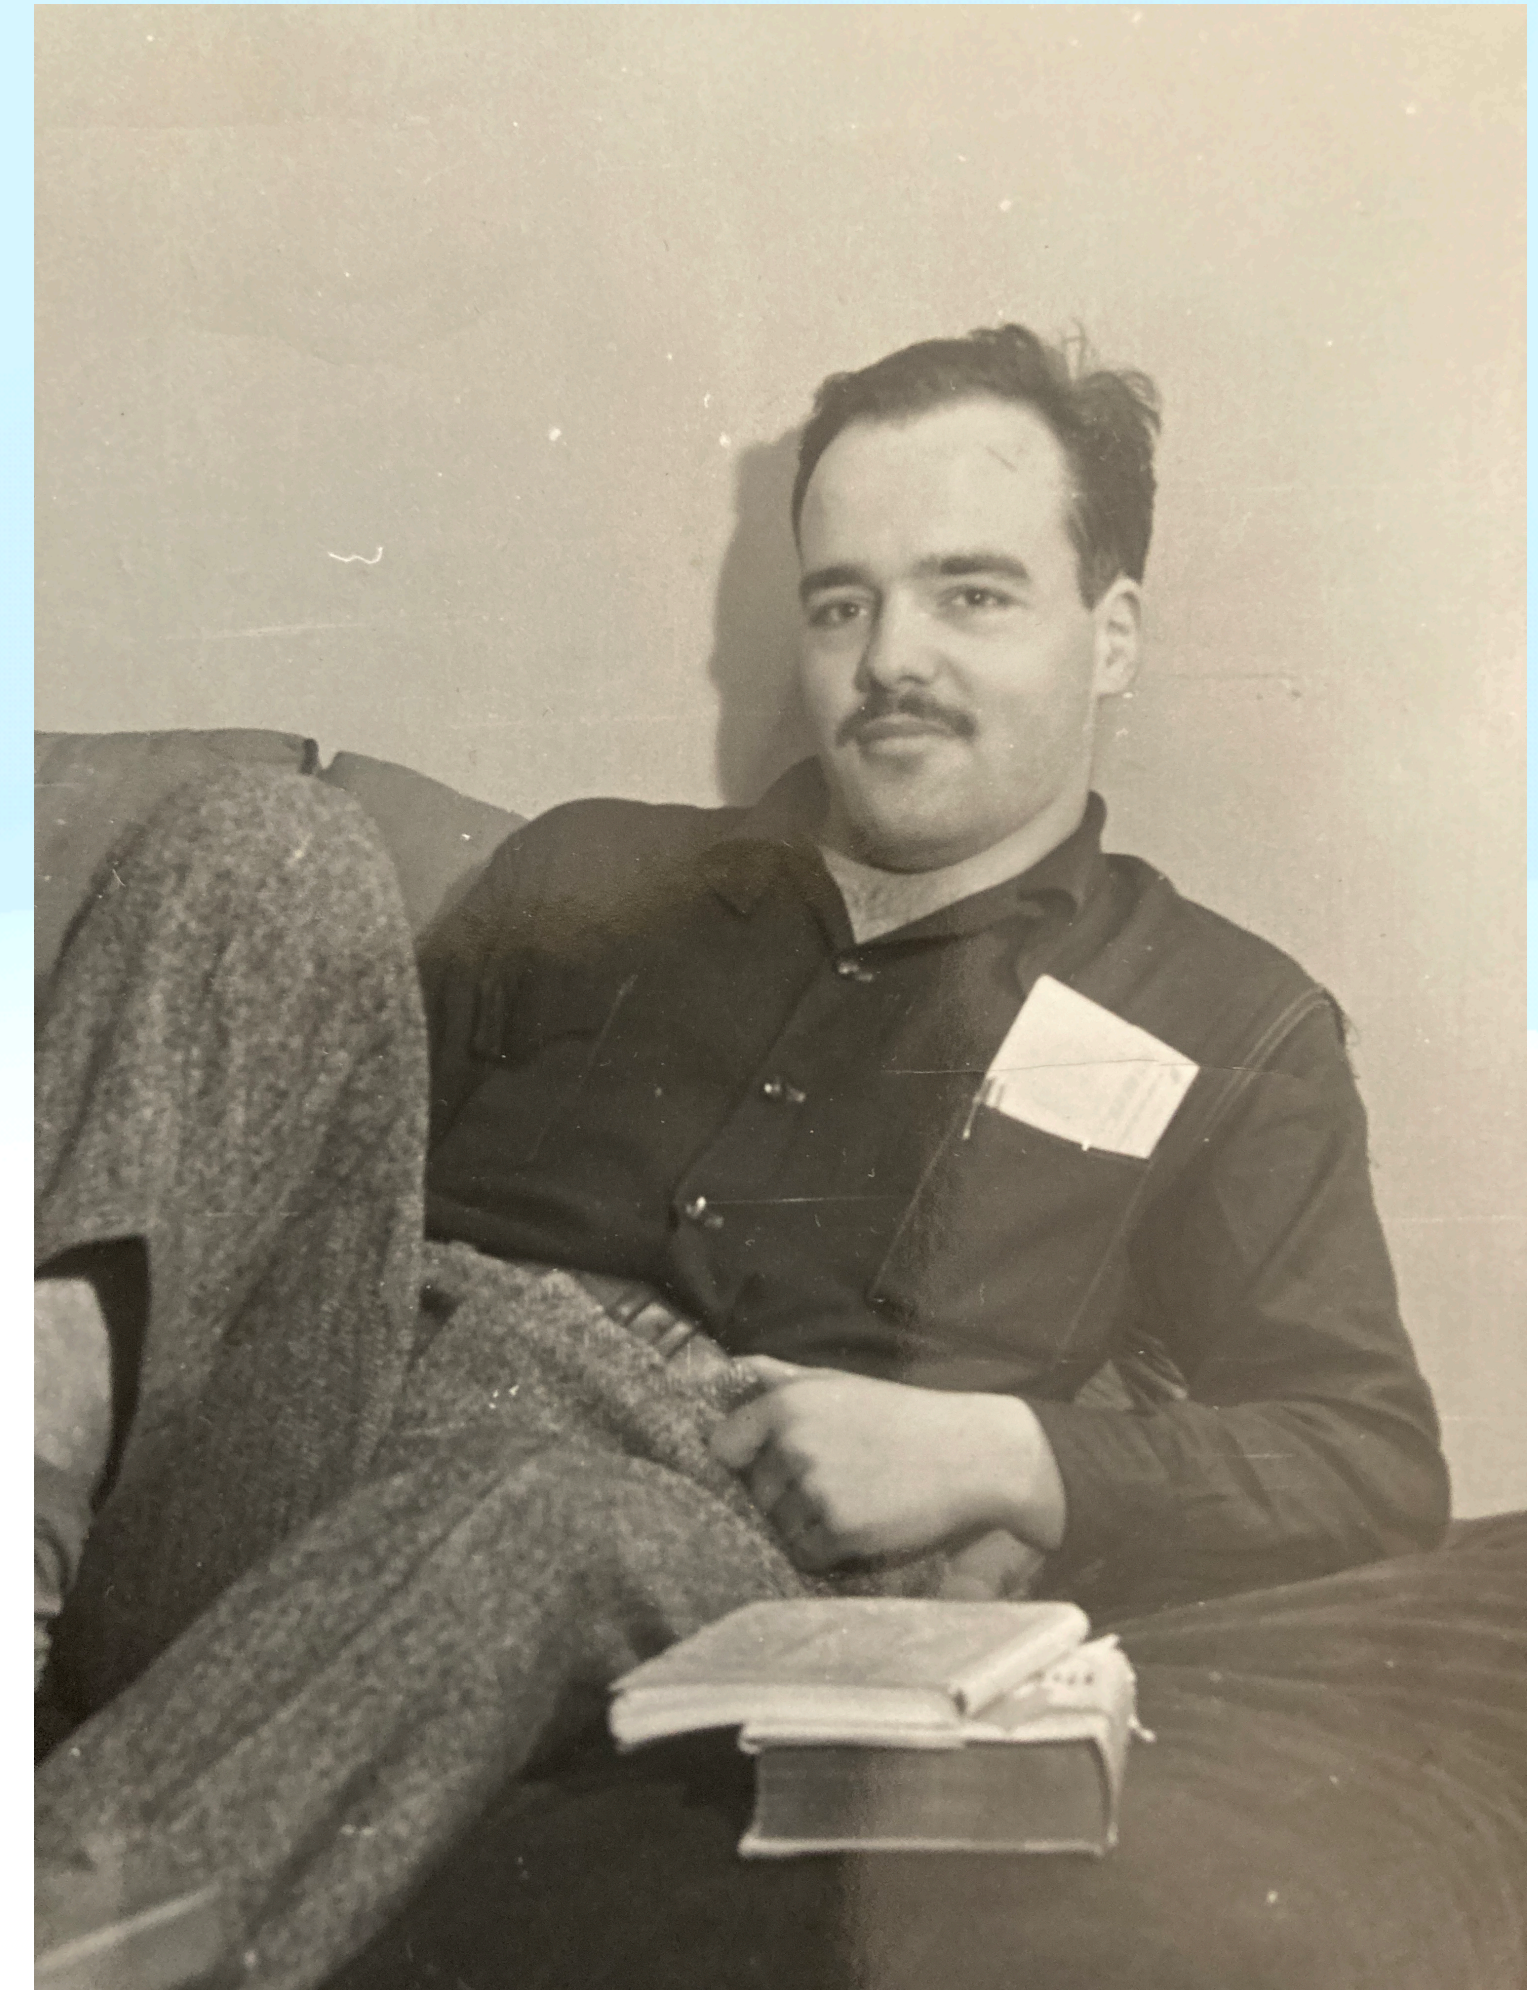

4th Mediterranean Plant Conservation Week. Valencia, Spain. October, 2023. Aurelio Penya, Doina Bird

Background

1928 - 1996

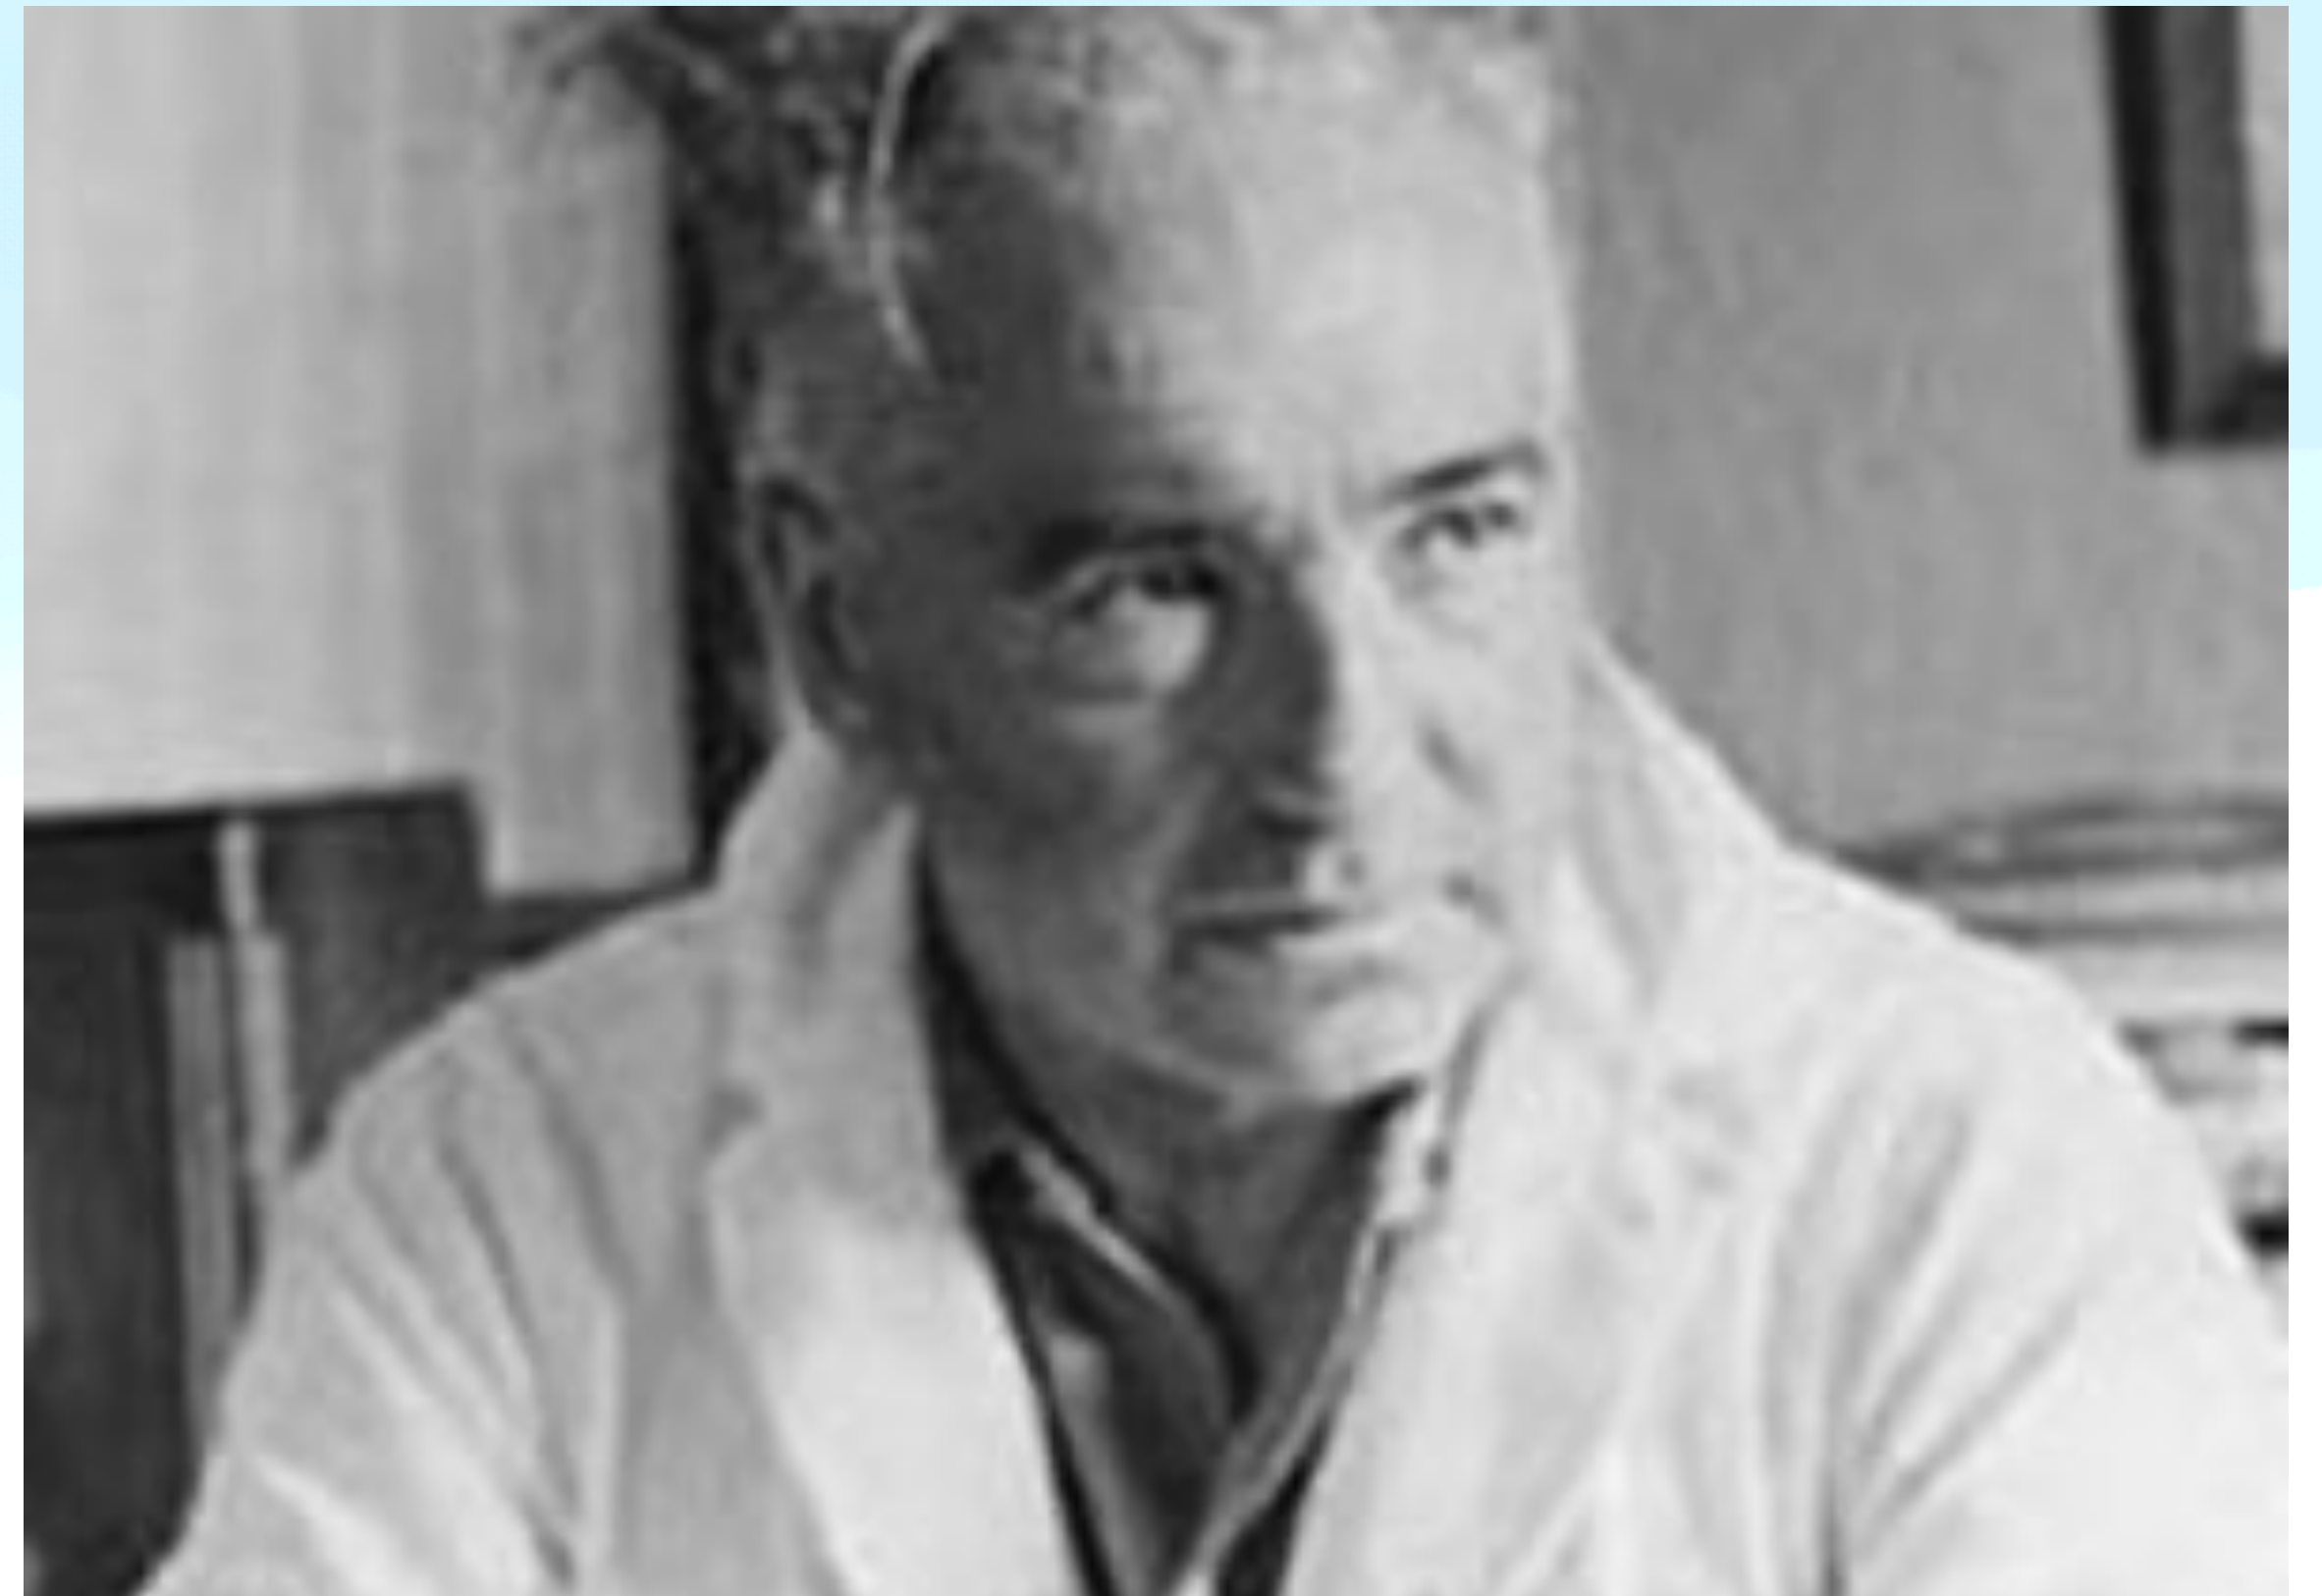

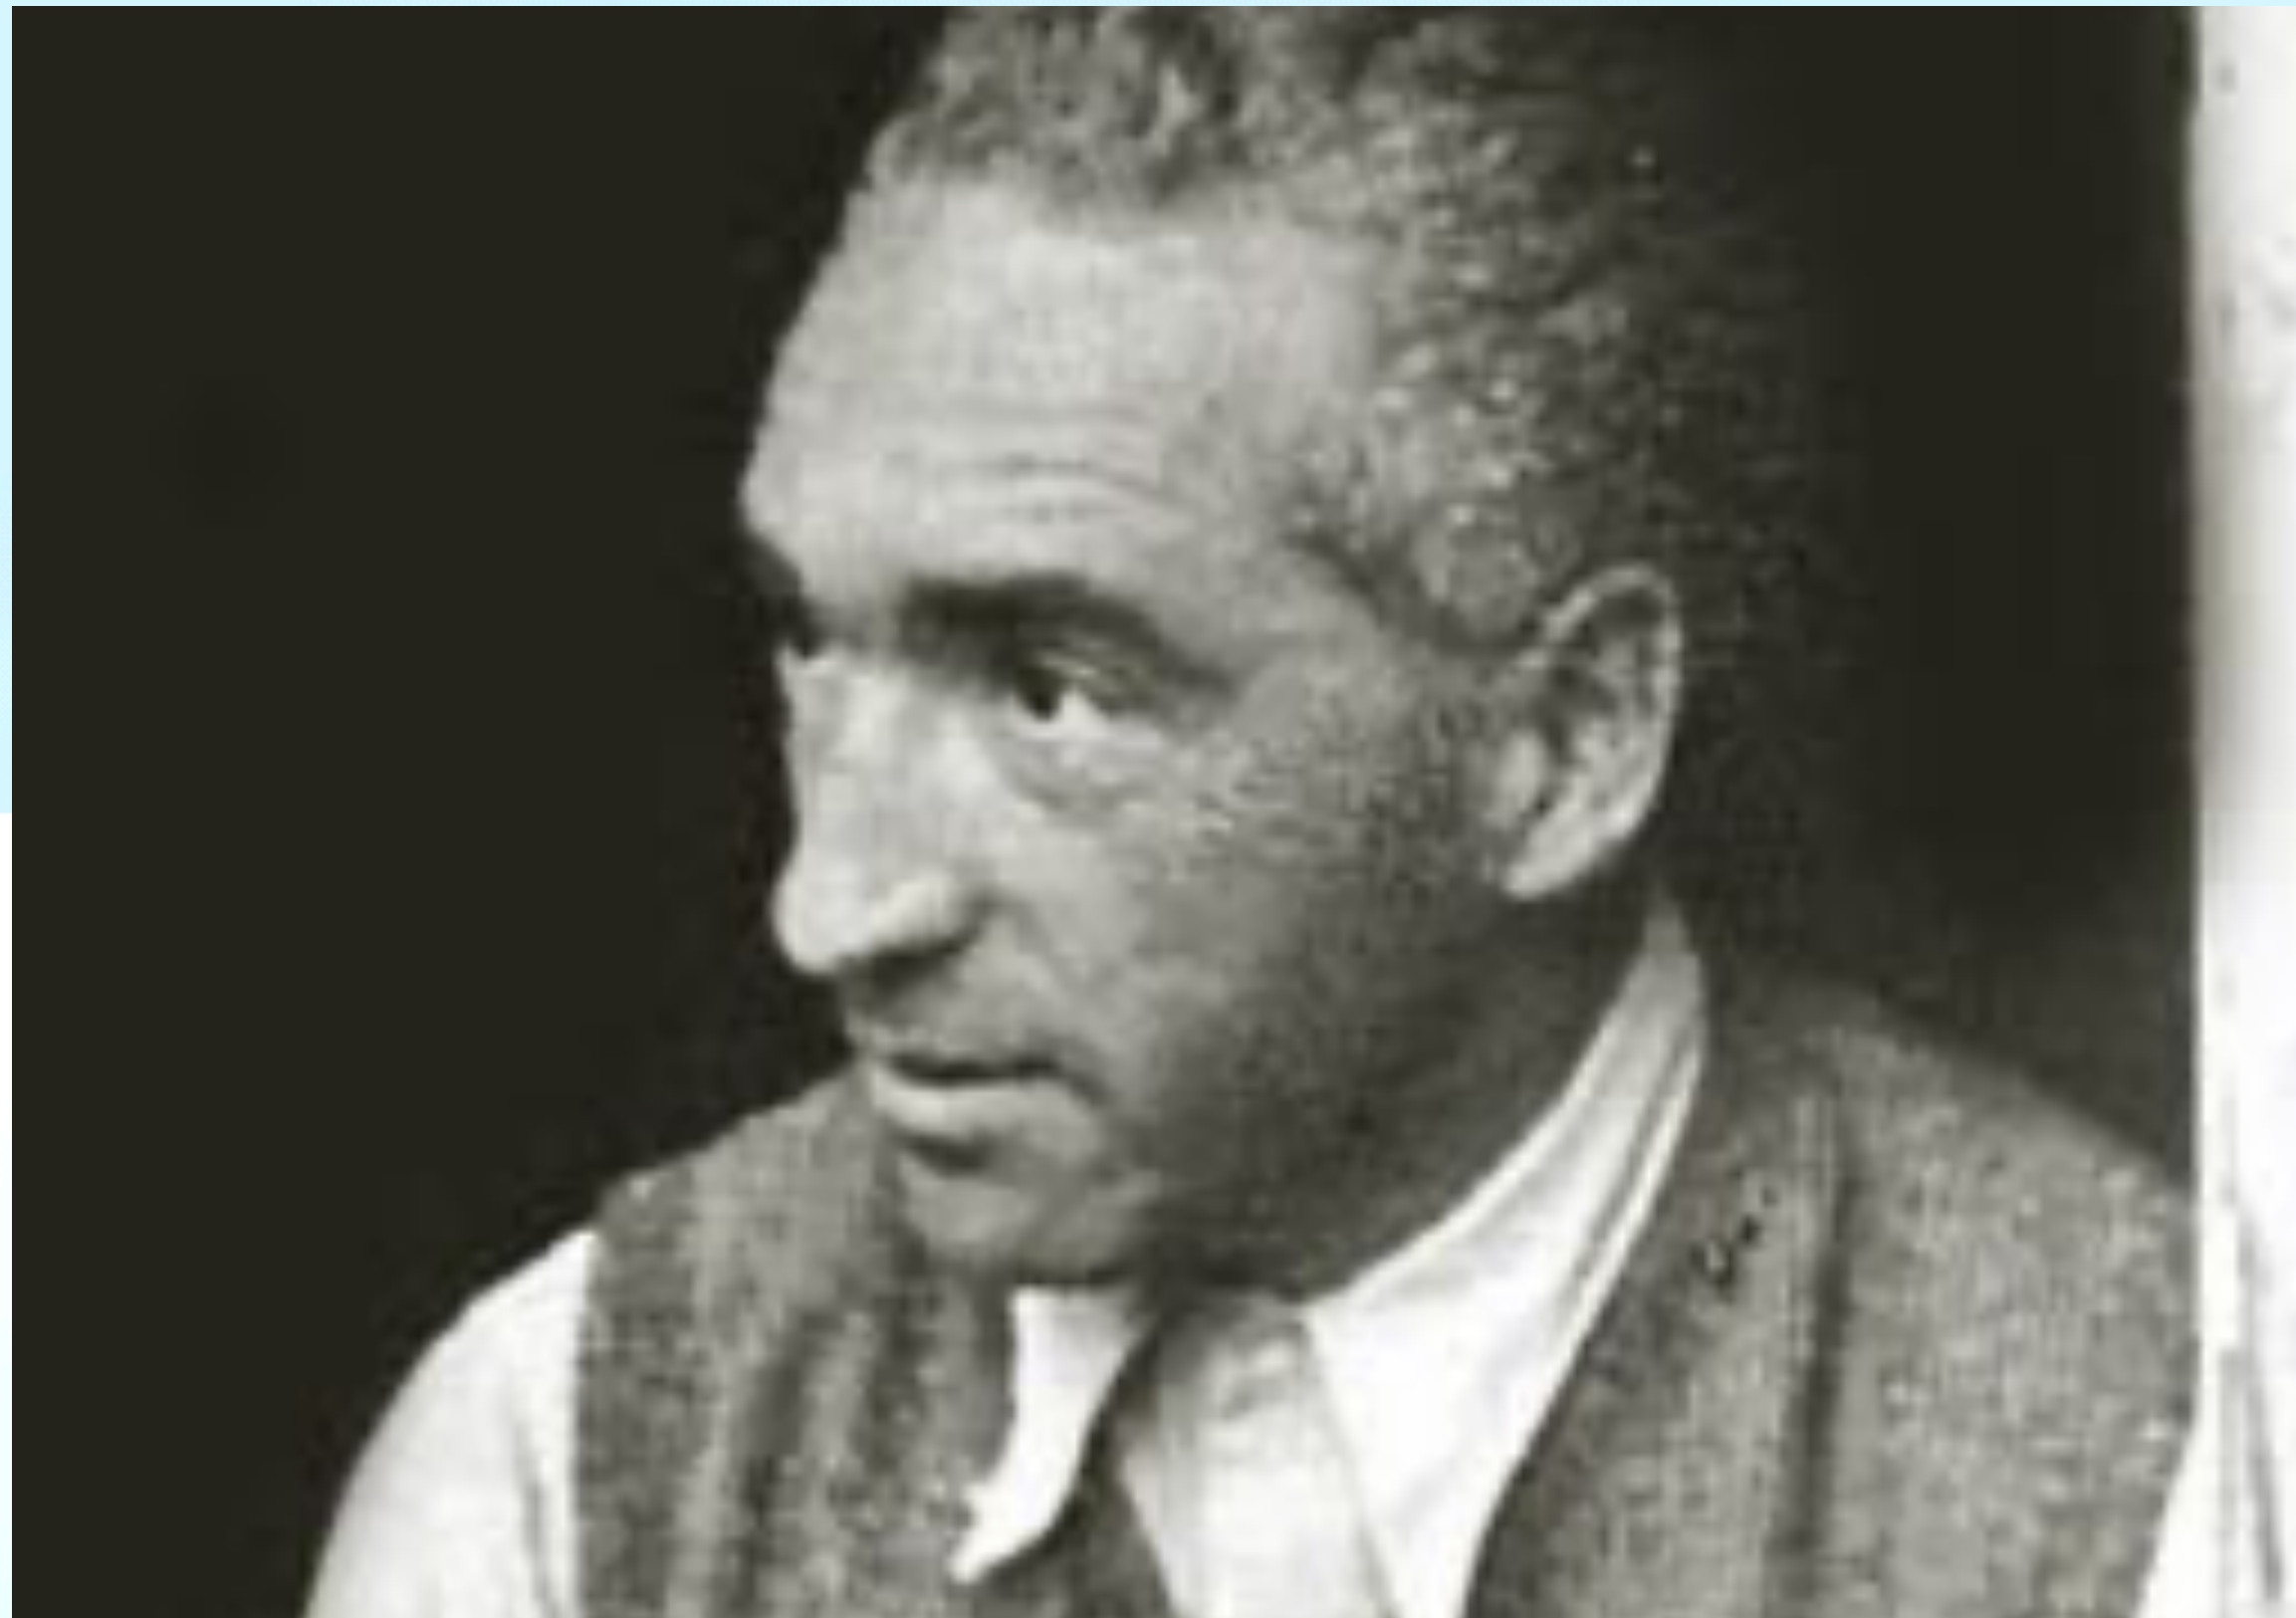

- Bachelors degree in Biology, Harvard
- languages, translator from Russian to English
- Rand
- CIA
- Studies in Anthropology, University of Hawaii
- Vietnam

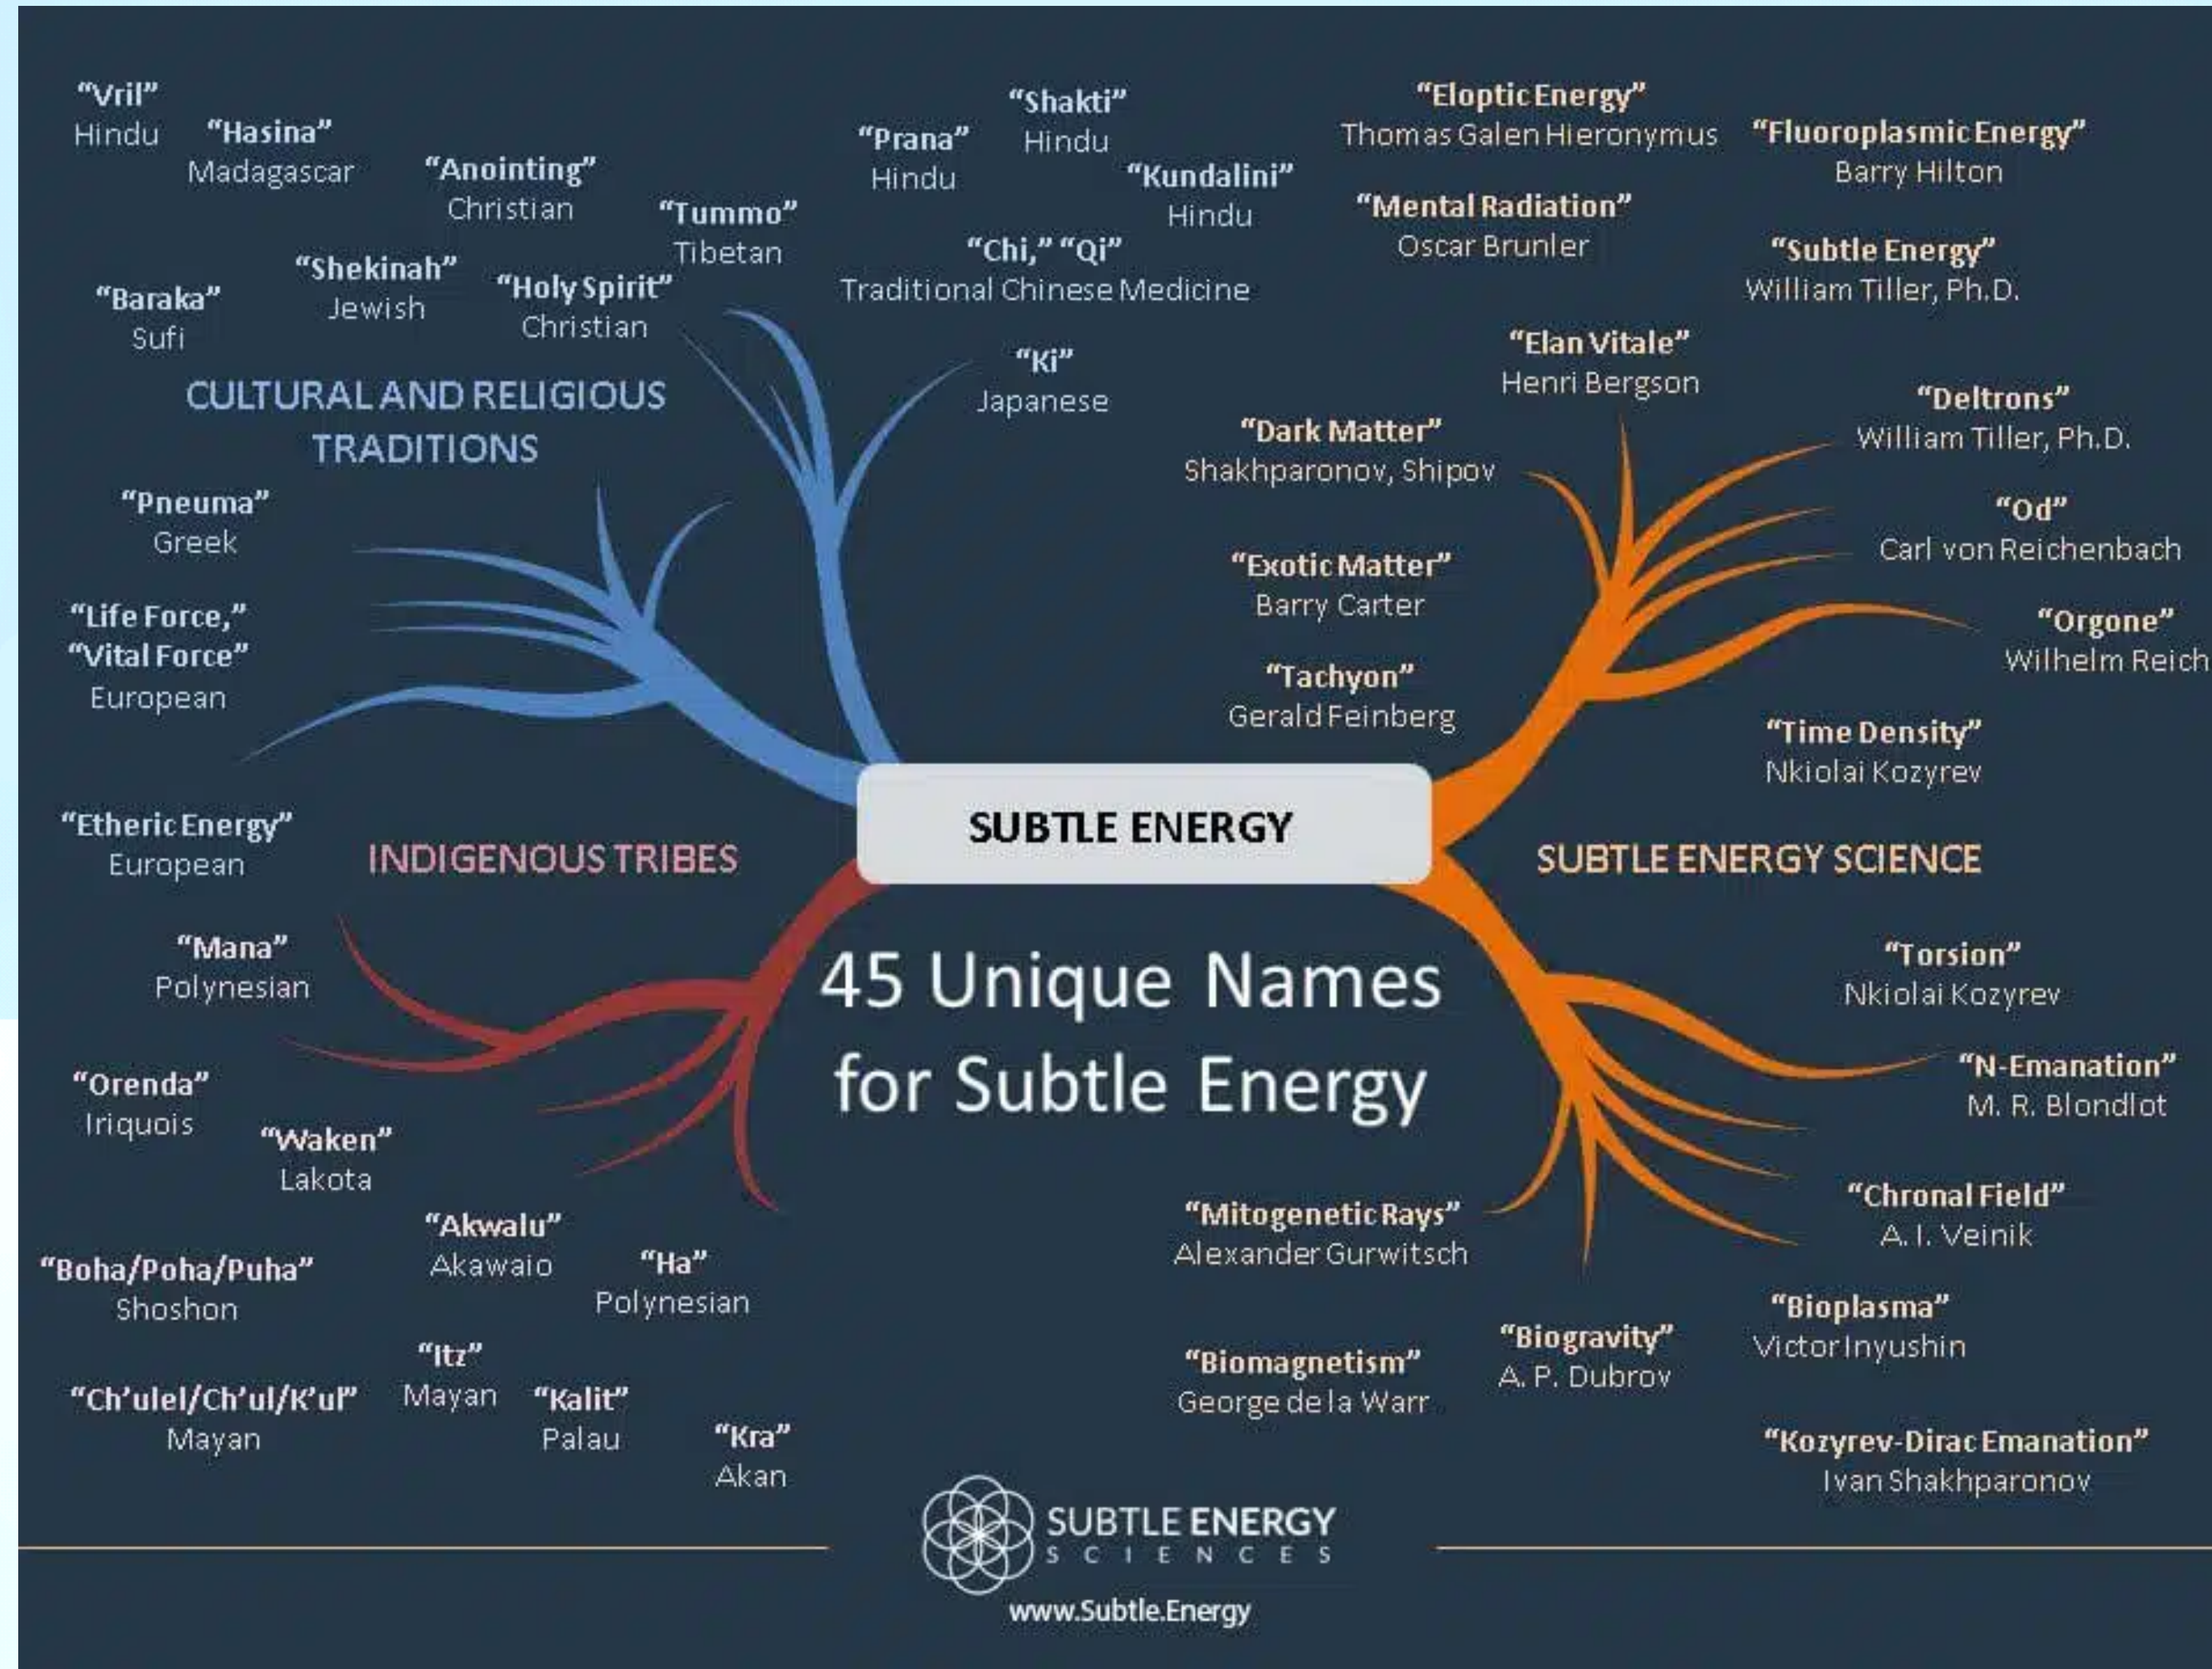

4th Mediterranean Plant Conservation Week. Valencia, Spain. October, 2023. Aurelio Penya, Doina Bird

Wilhelm Reich (1897-1957)

Collaborator of Freud, Biophysics in 1930, discovered orgone

4th Mediterranean Plant Conservation Week. Valencia, Spain. October, 2023. Aurelio Peña, Doina Bird

Marcel Vogel (1917-1991)

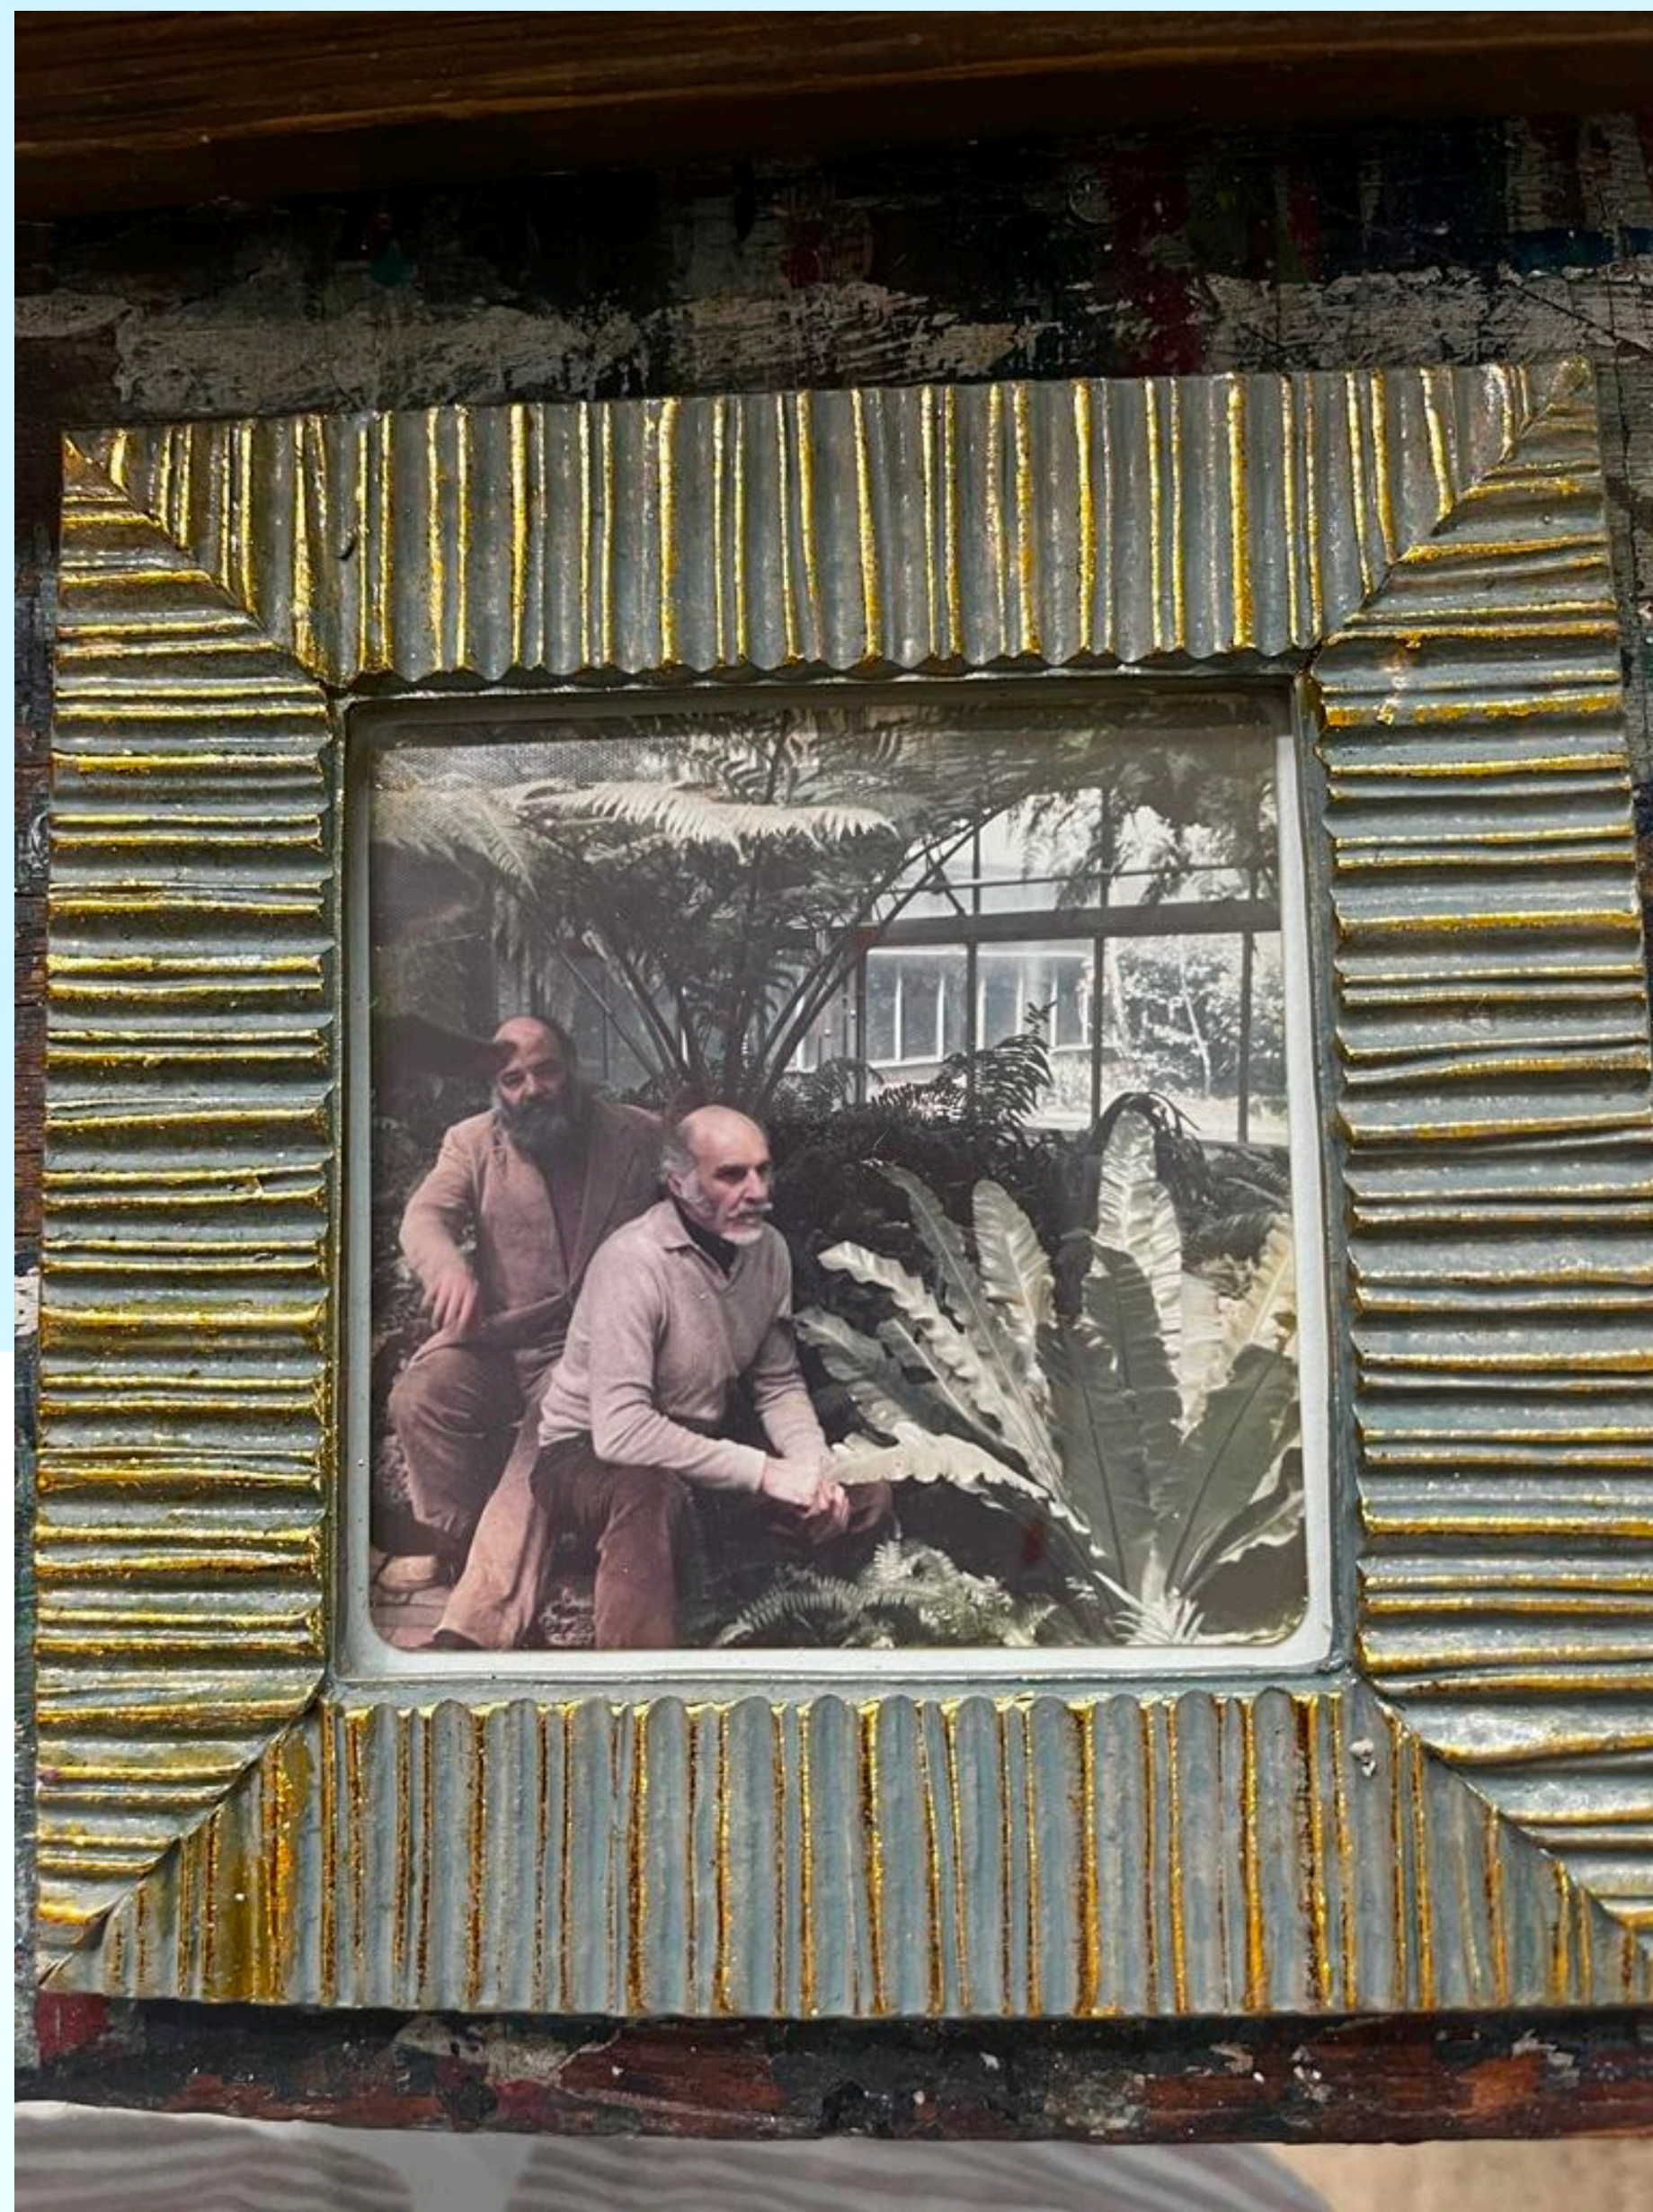

Senior researcher, IBM, California

At first he rejected Backster's concept of communication between plants and humans.

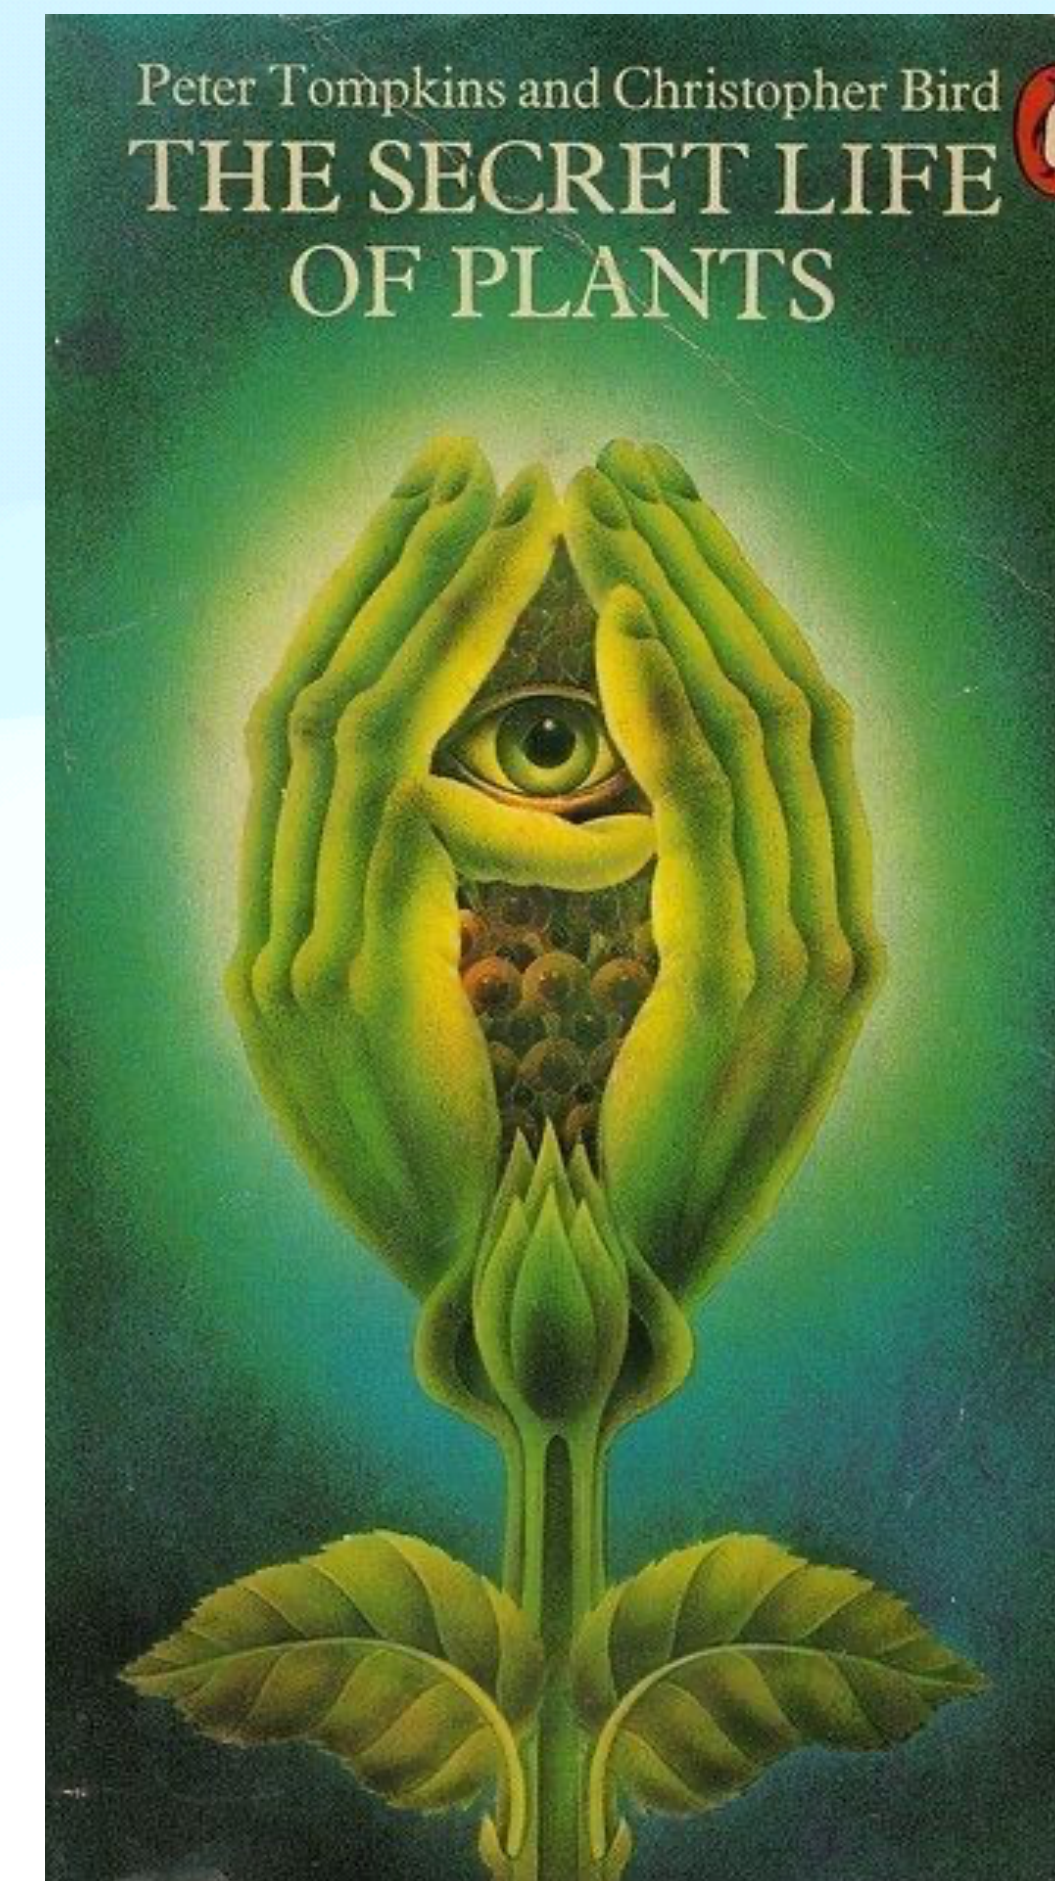

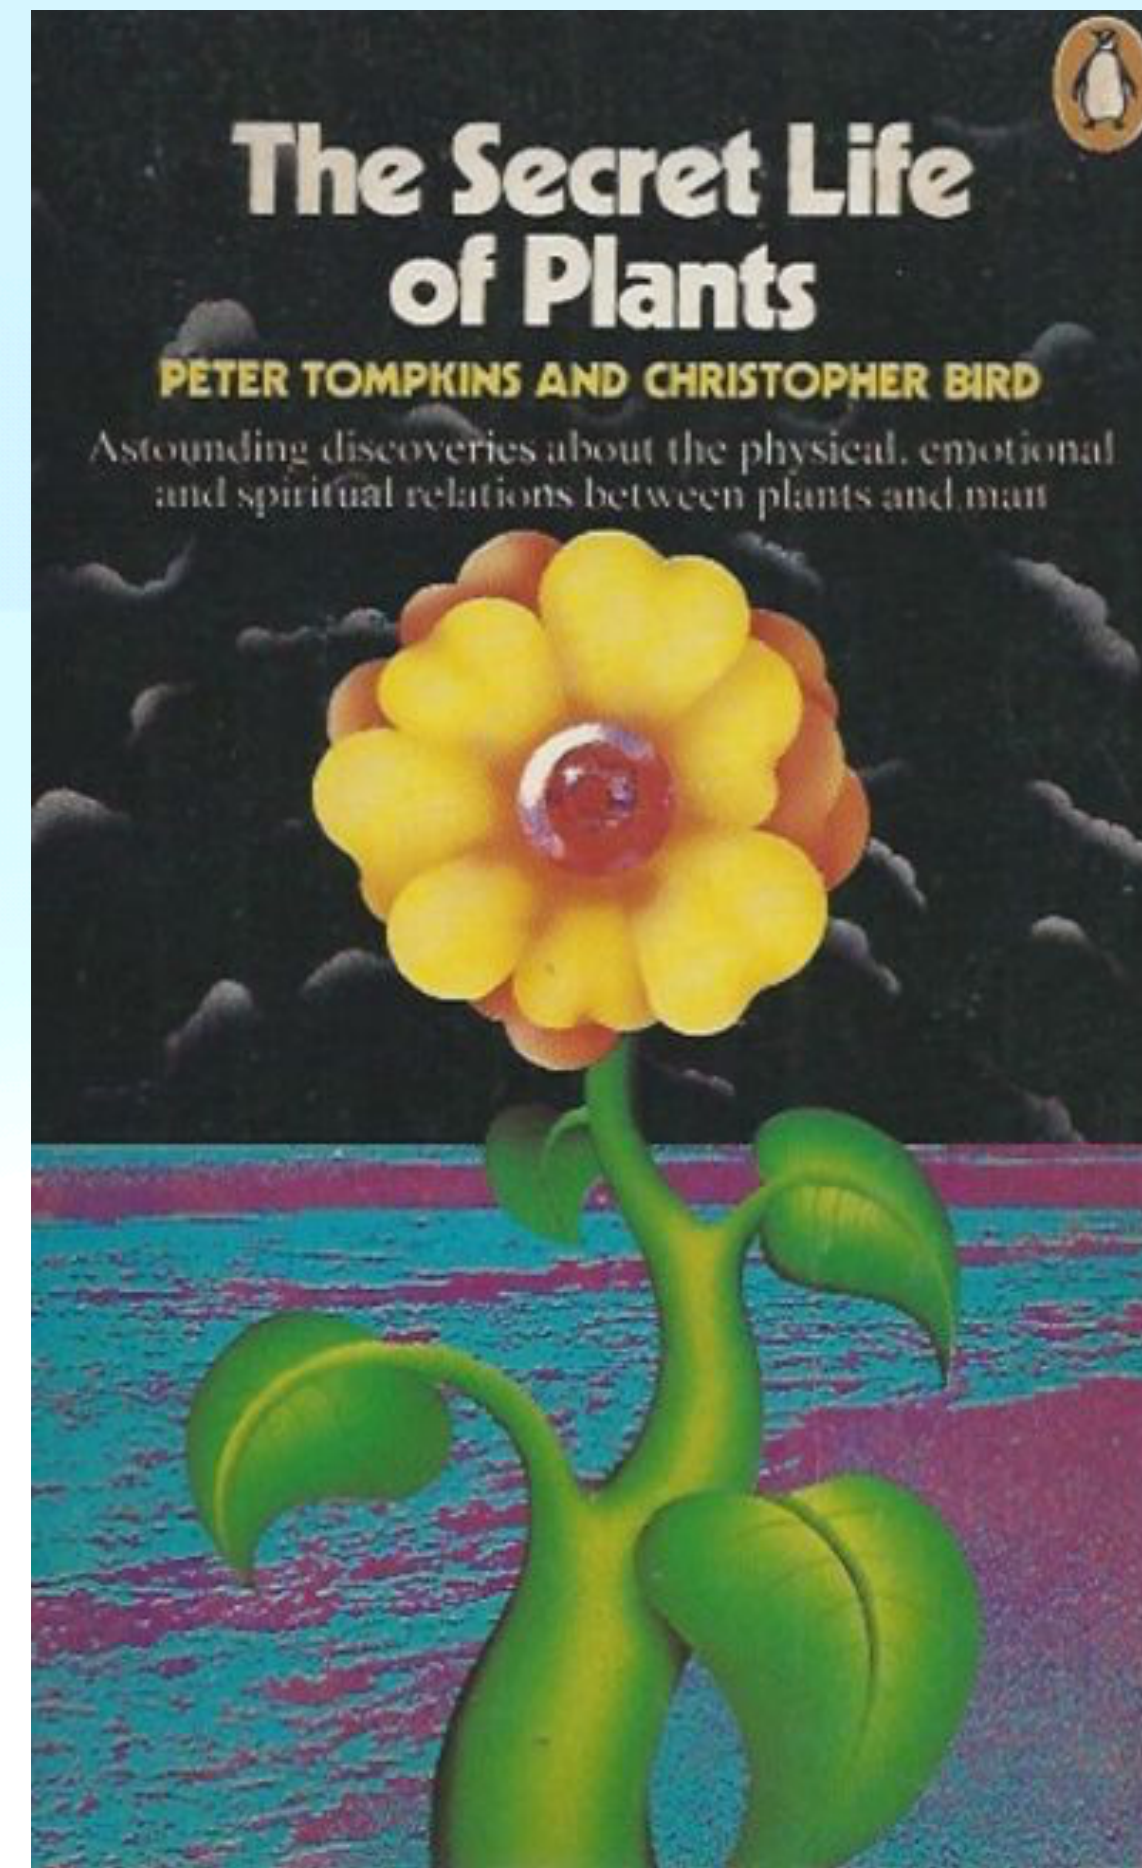

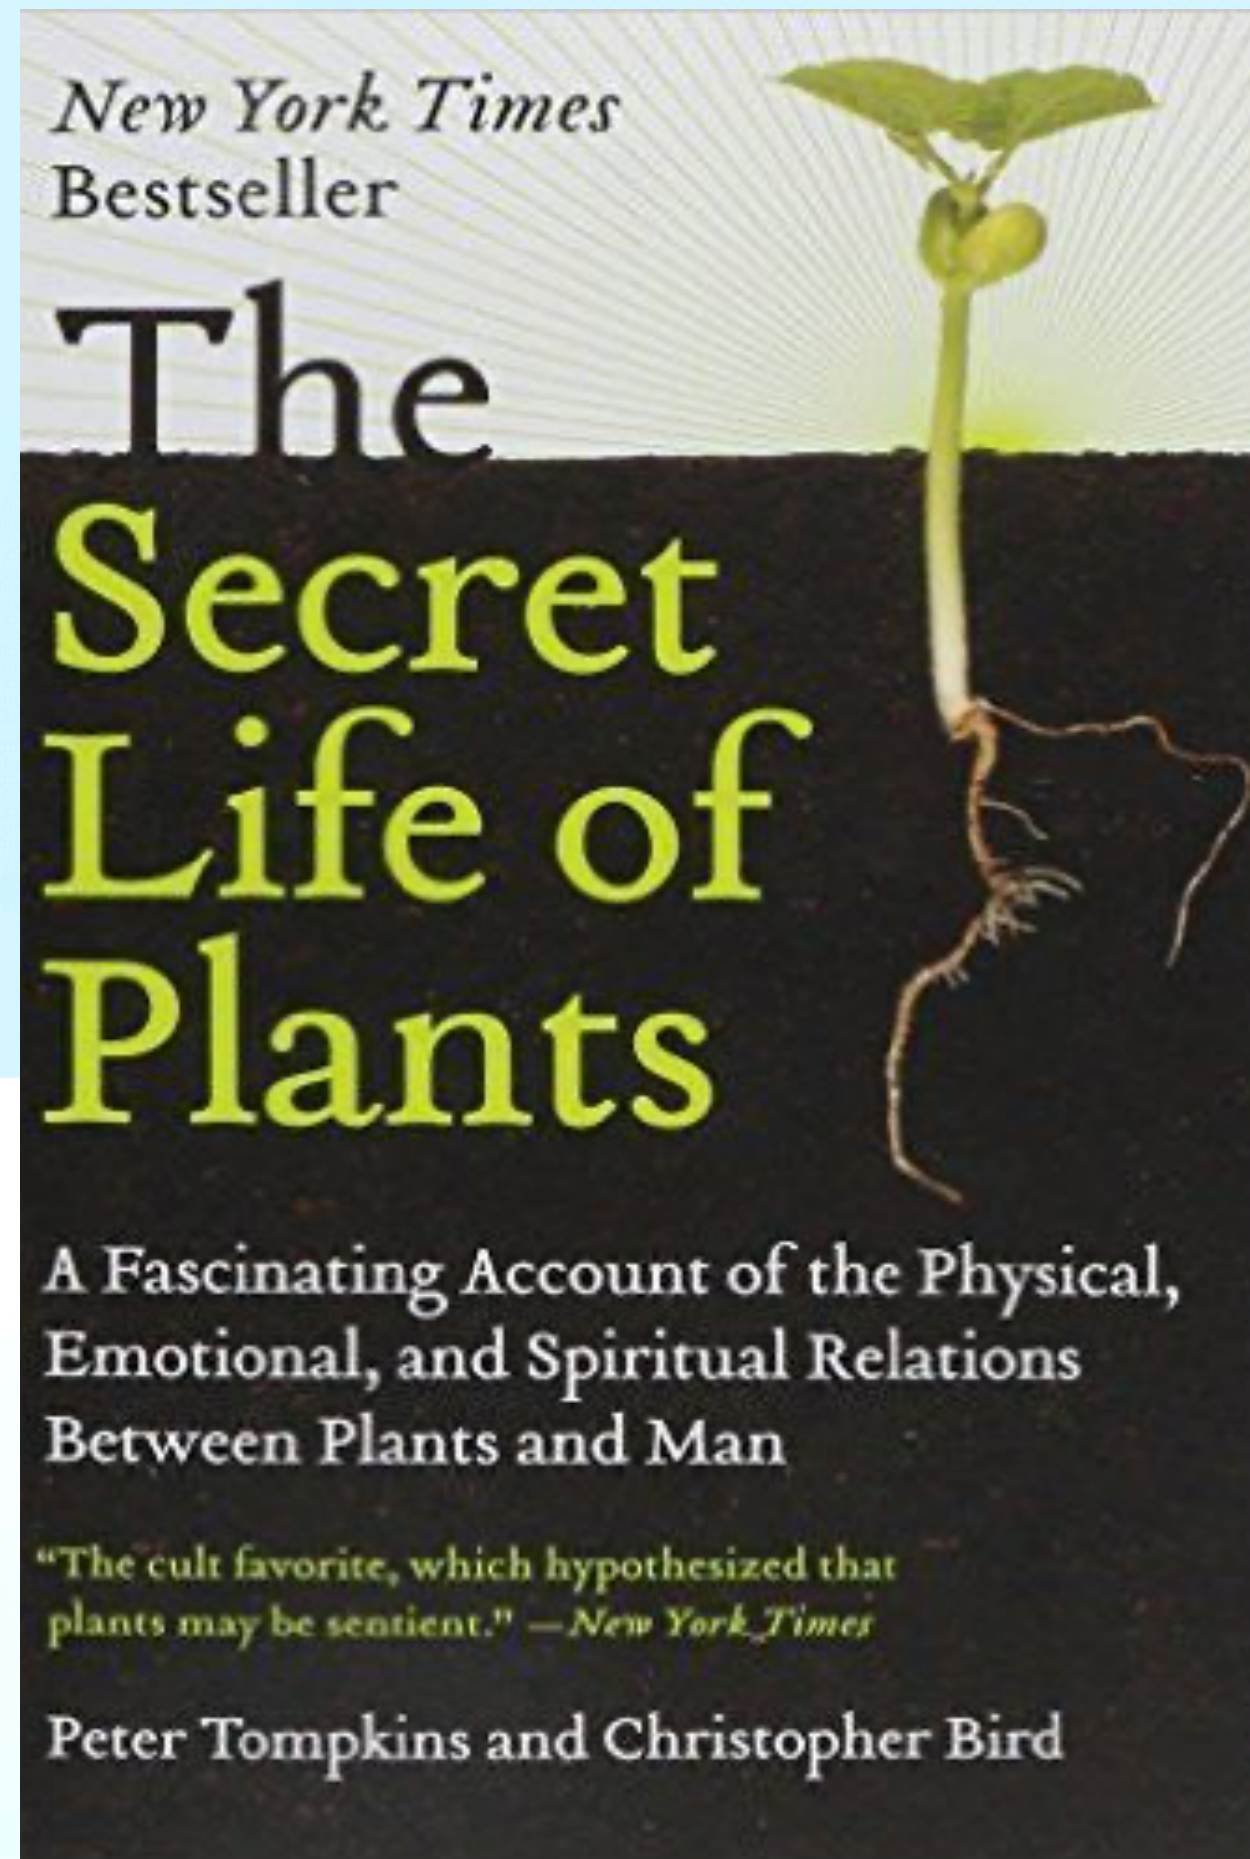

Decided to duplicate Backster's experiments, using philodendrons, discovering vital force within plants, animals and humans.

Crystal technology and Consciousness

4th Mediterranean Plant Conservation Week. Valencia, Spain. October, 2023. Aurelio Penya, Doina Bird

4th Mediterranean Plant Conservation Week. Valencia, Spain. October, 2023. Aurelio Penya, Doina Bird

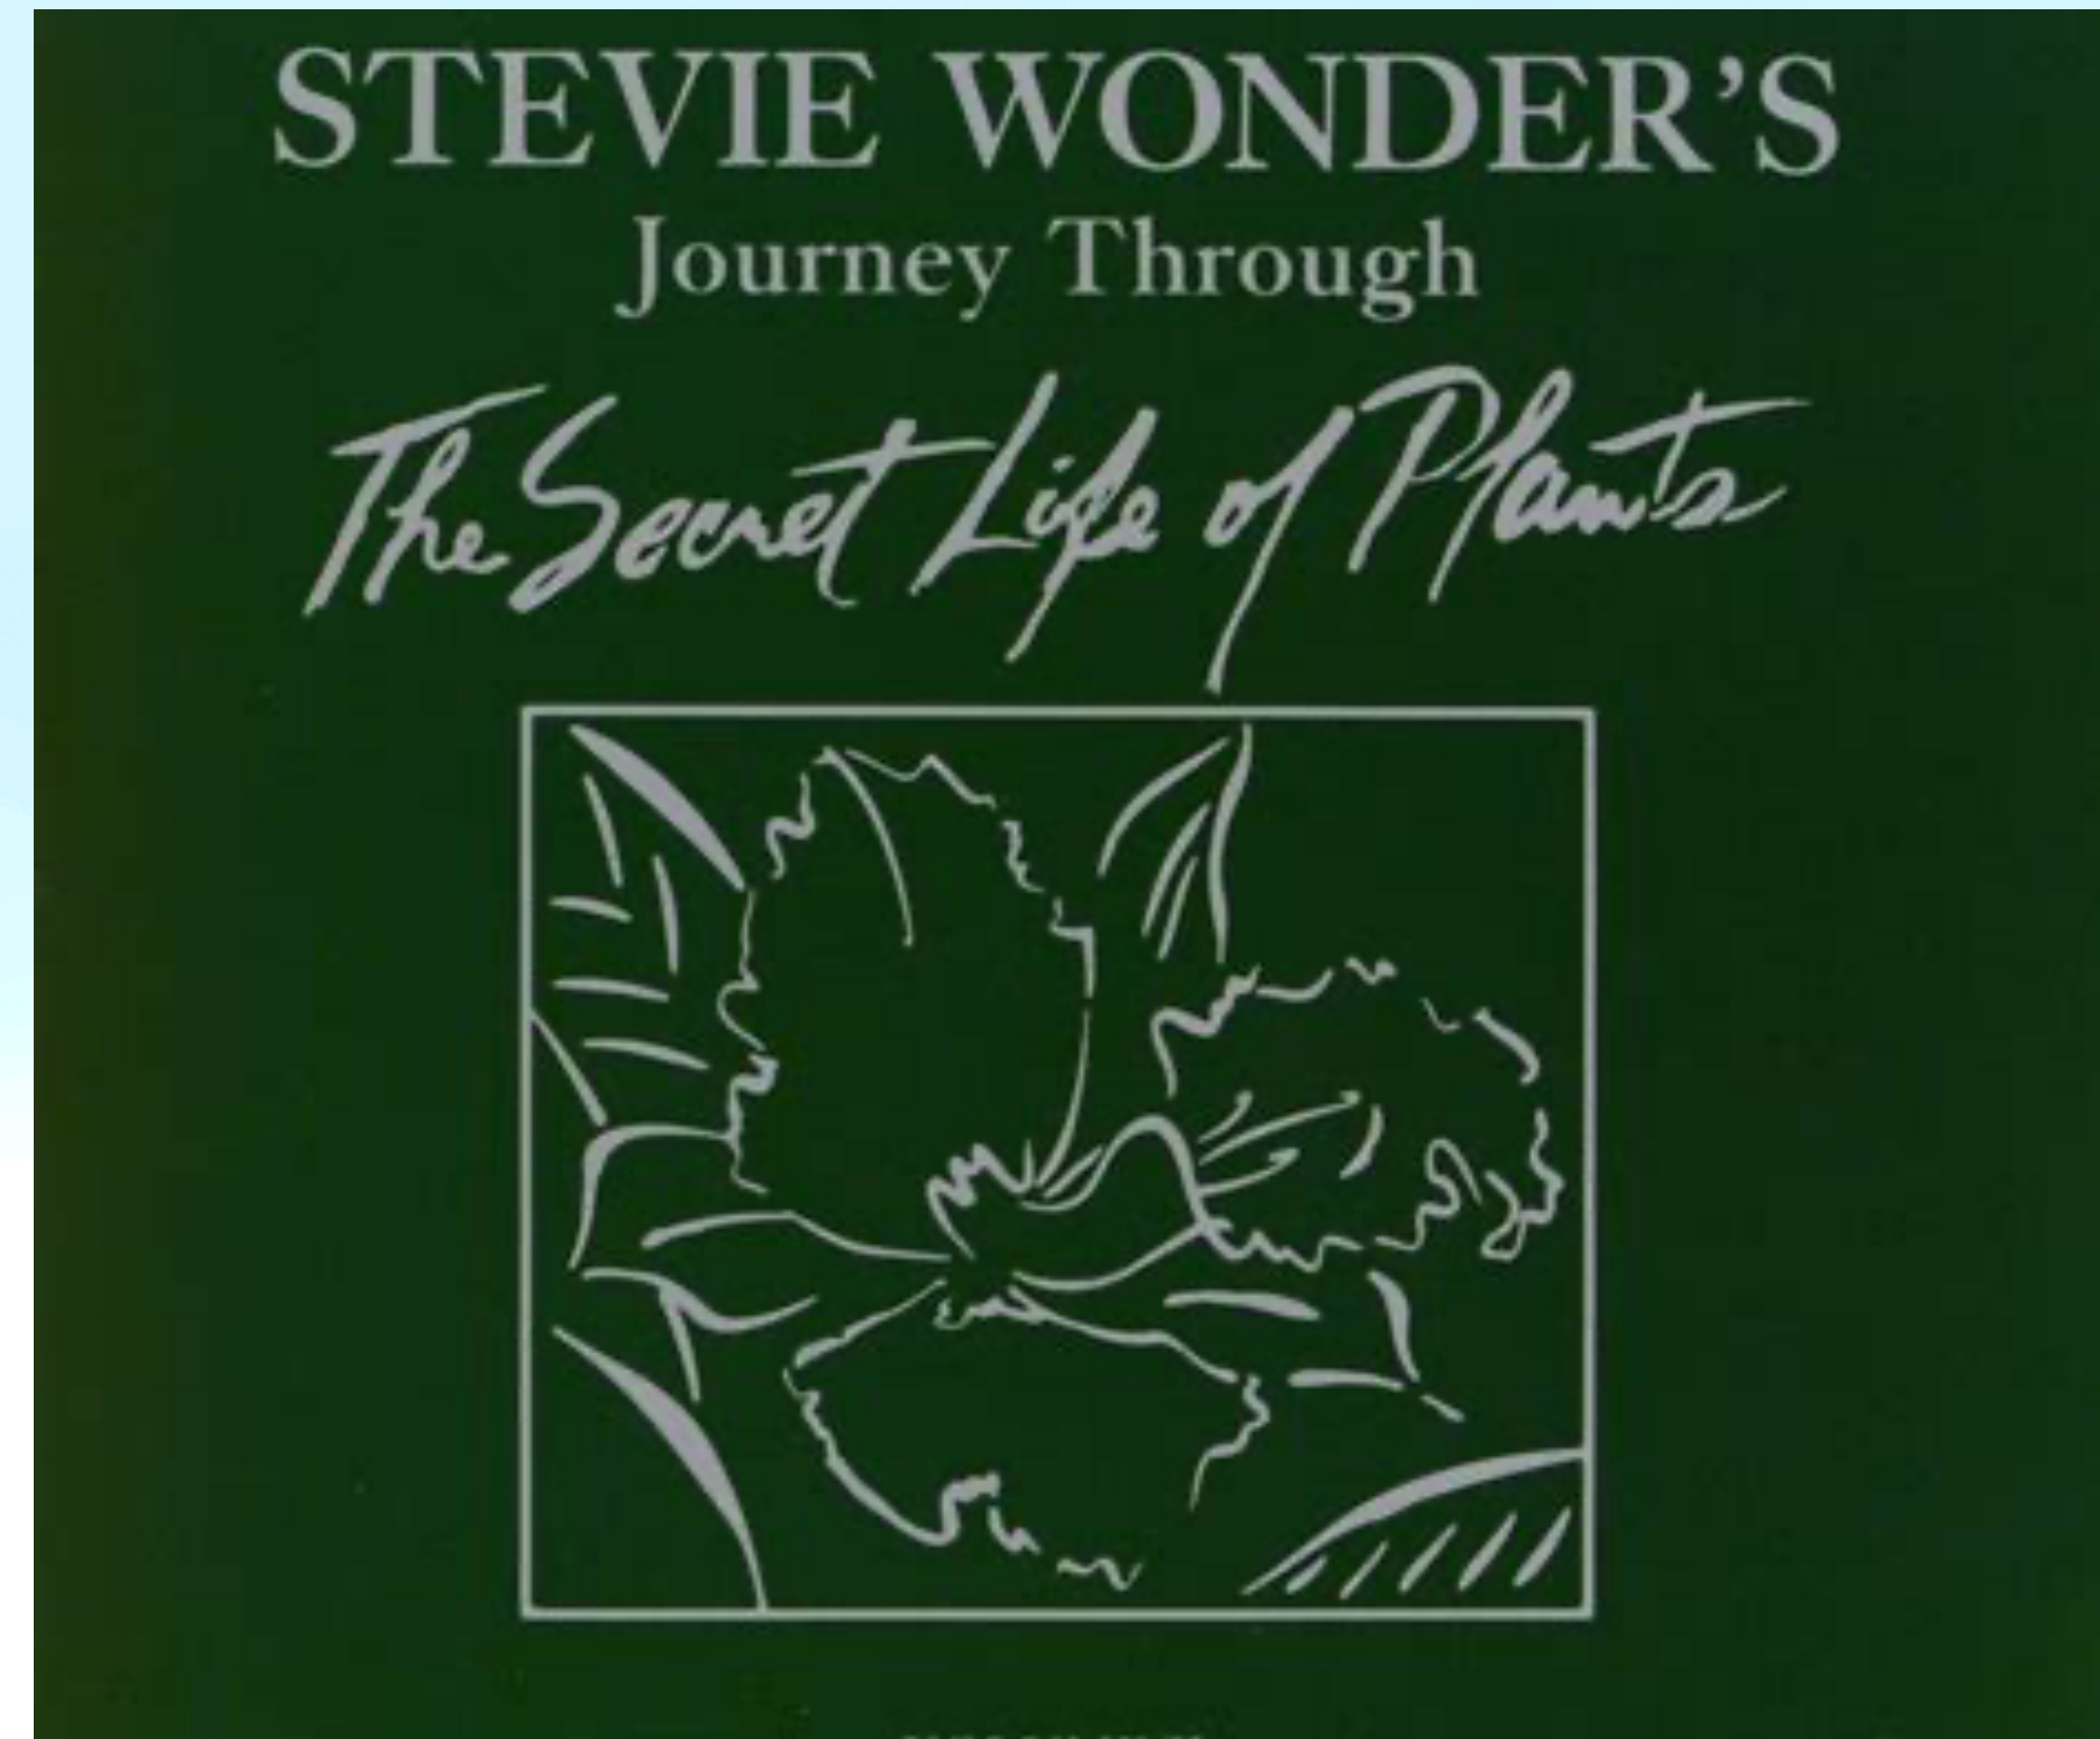

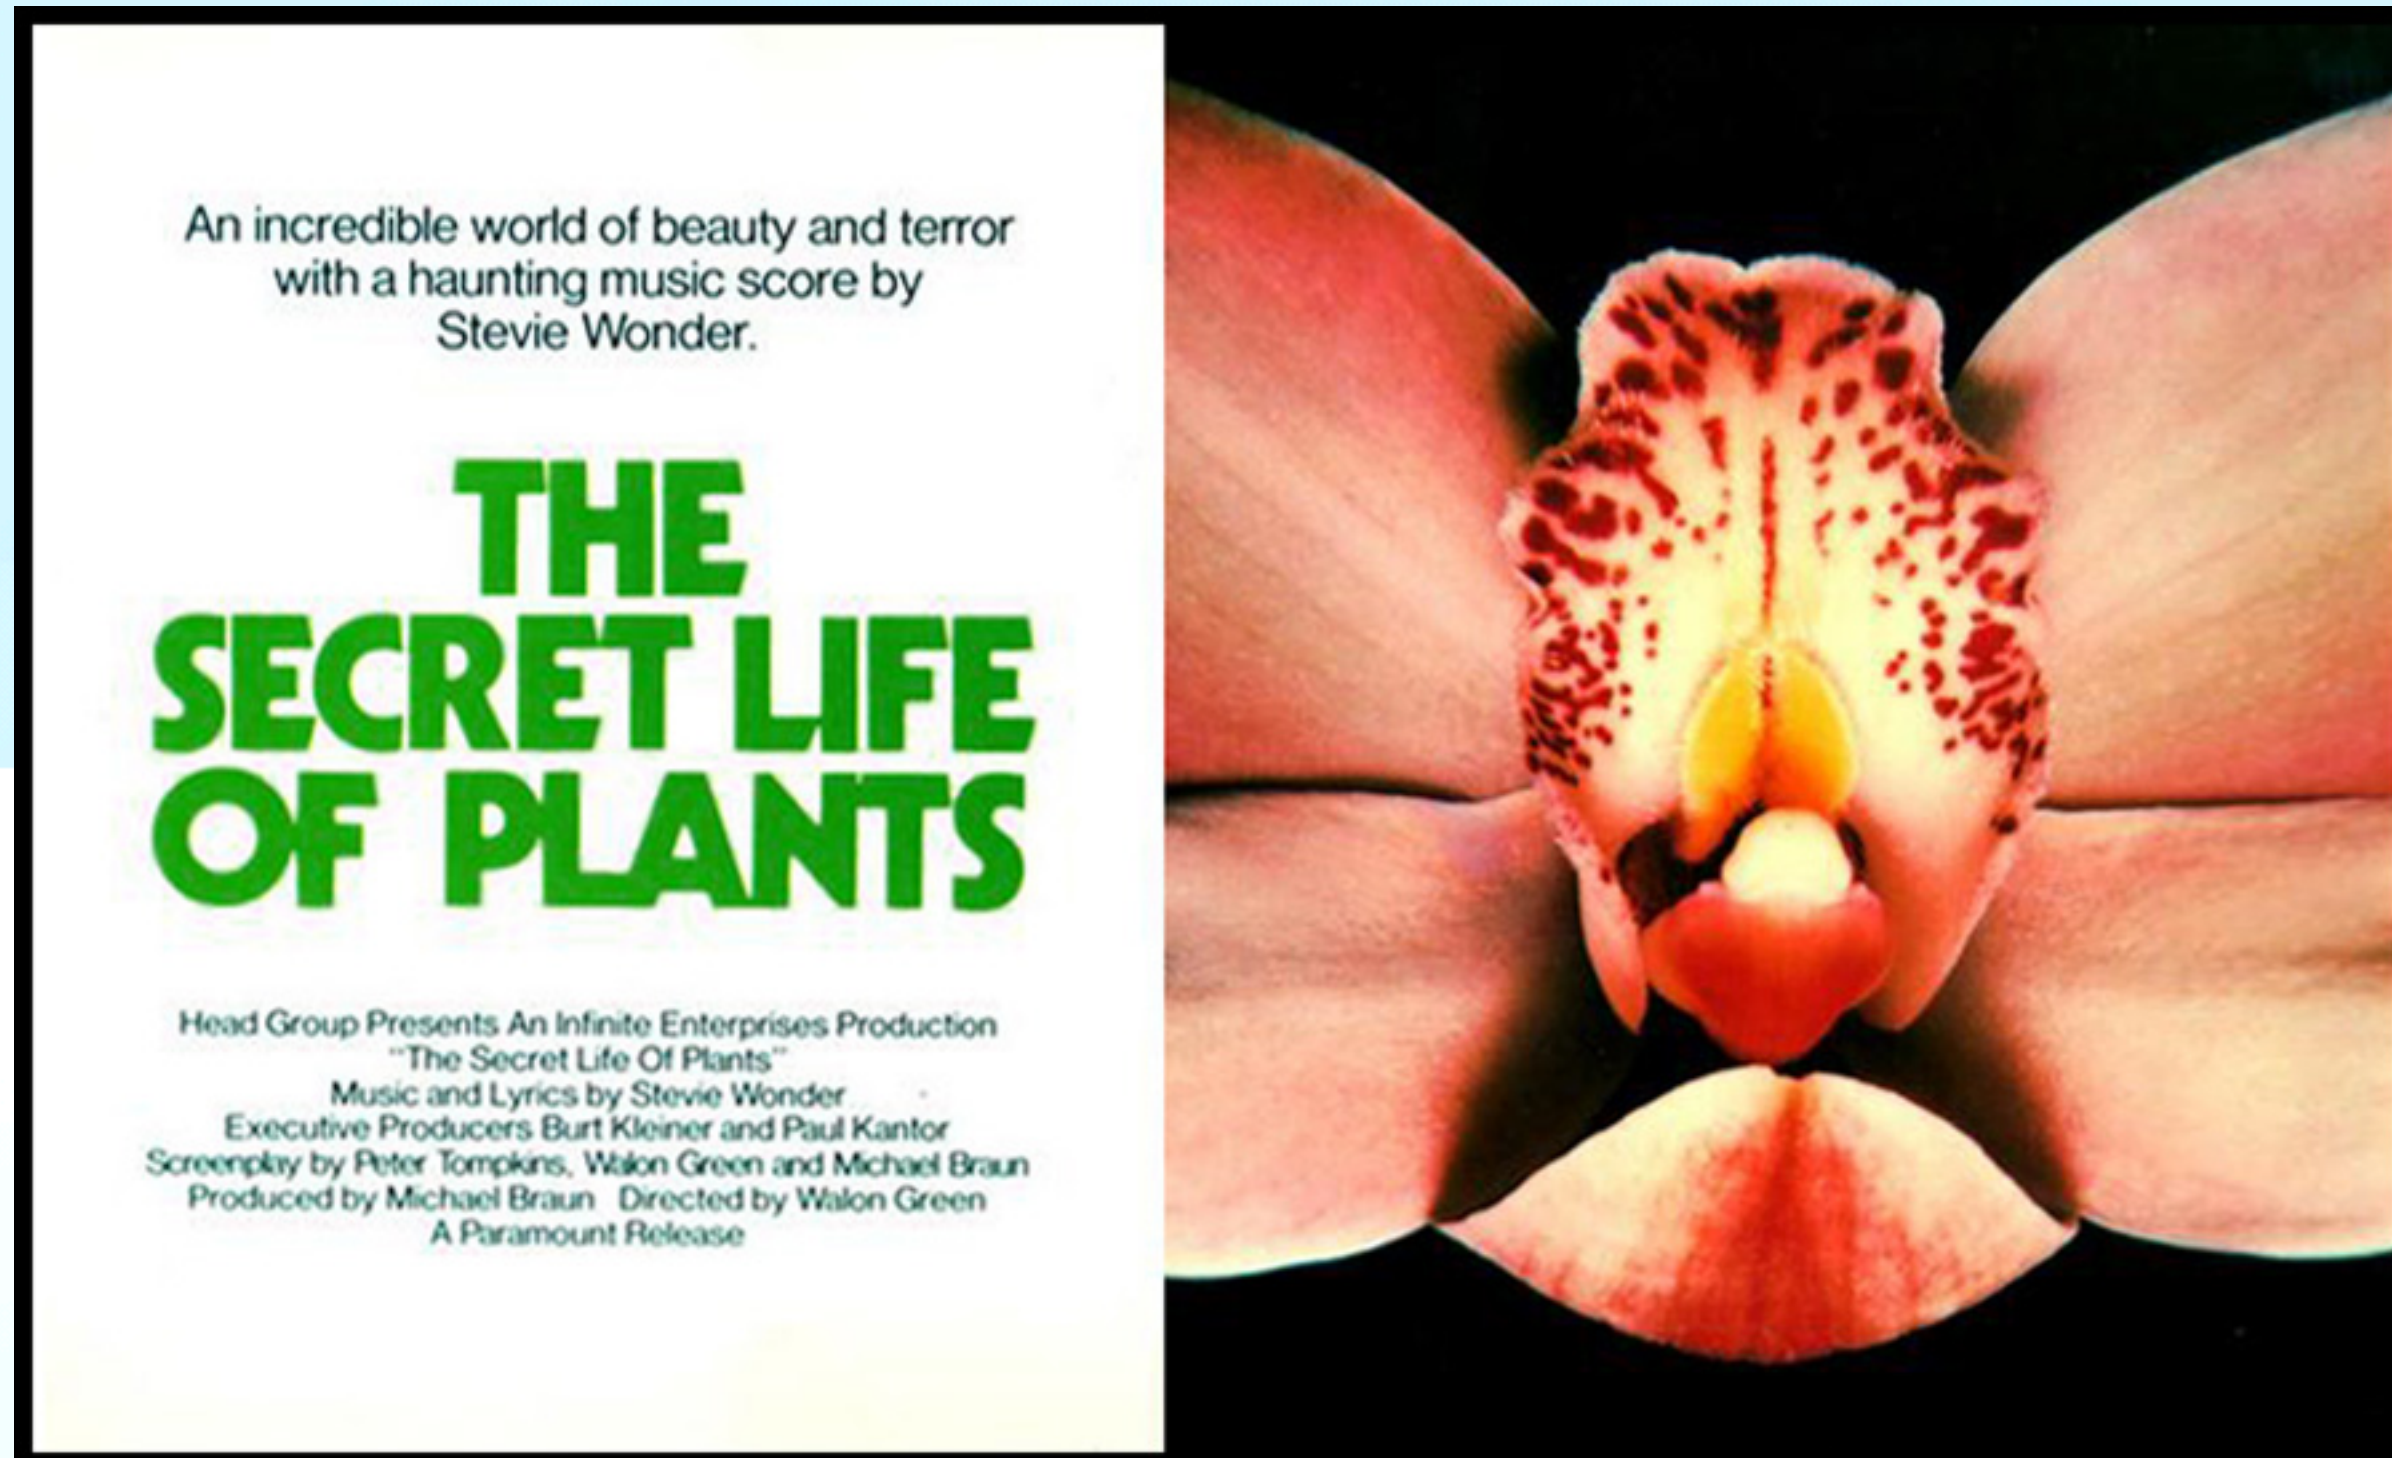

Dr. Royal Raymond Rife (1888 -1971)

Technological contribution in the fields of

- optics
- bio-electronic medicine
- radiochemistry
- biochemistry
- ballistics
- aviation

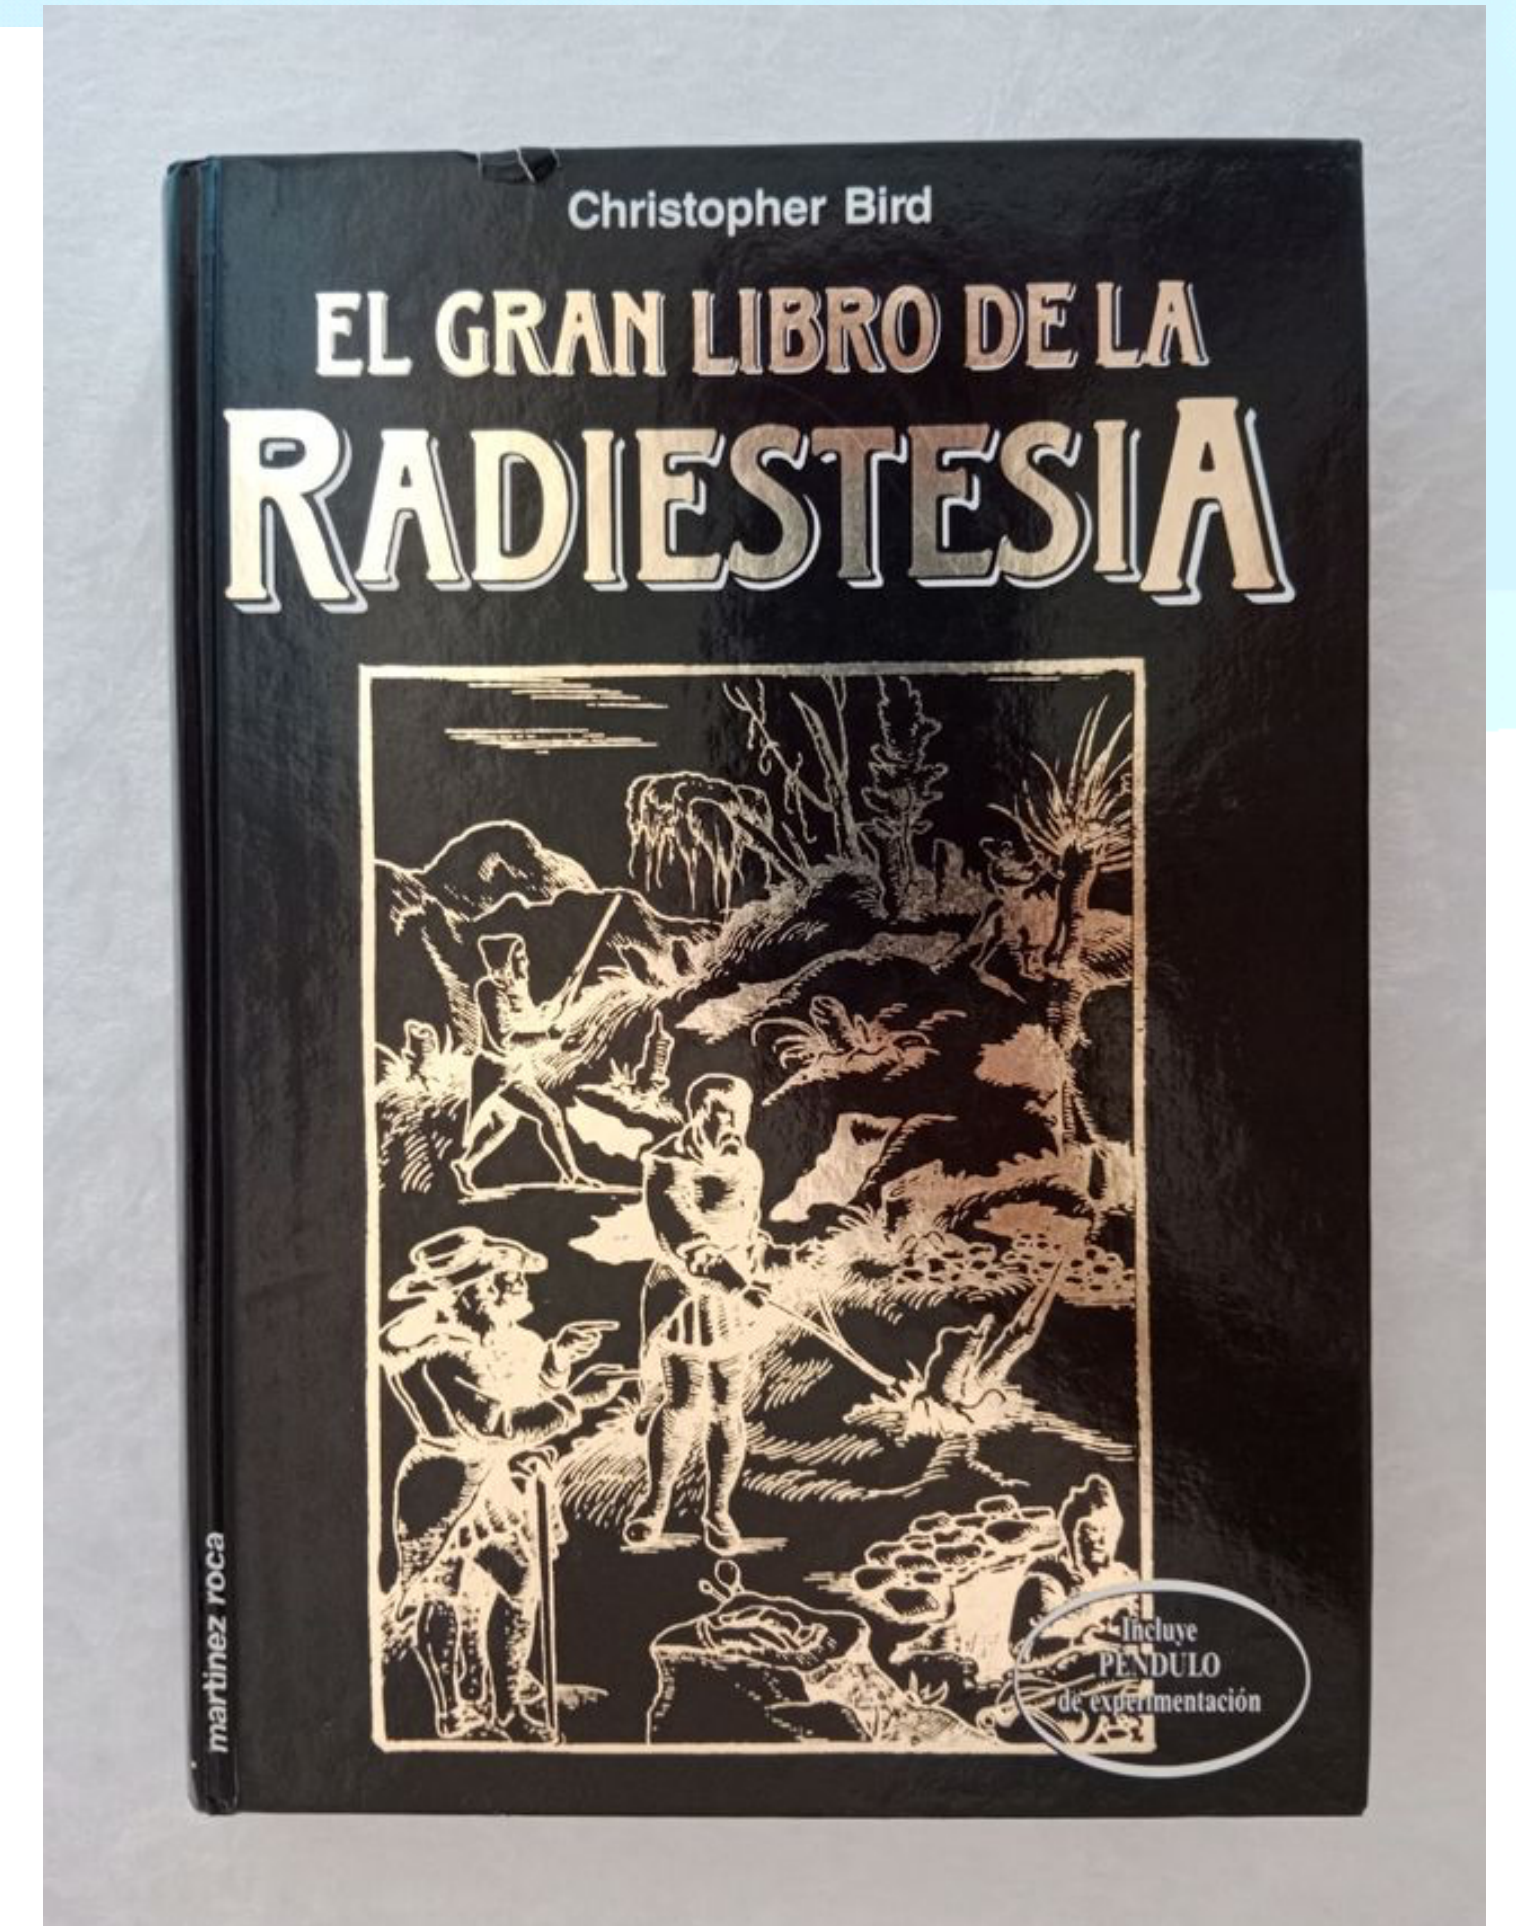

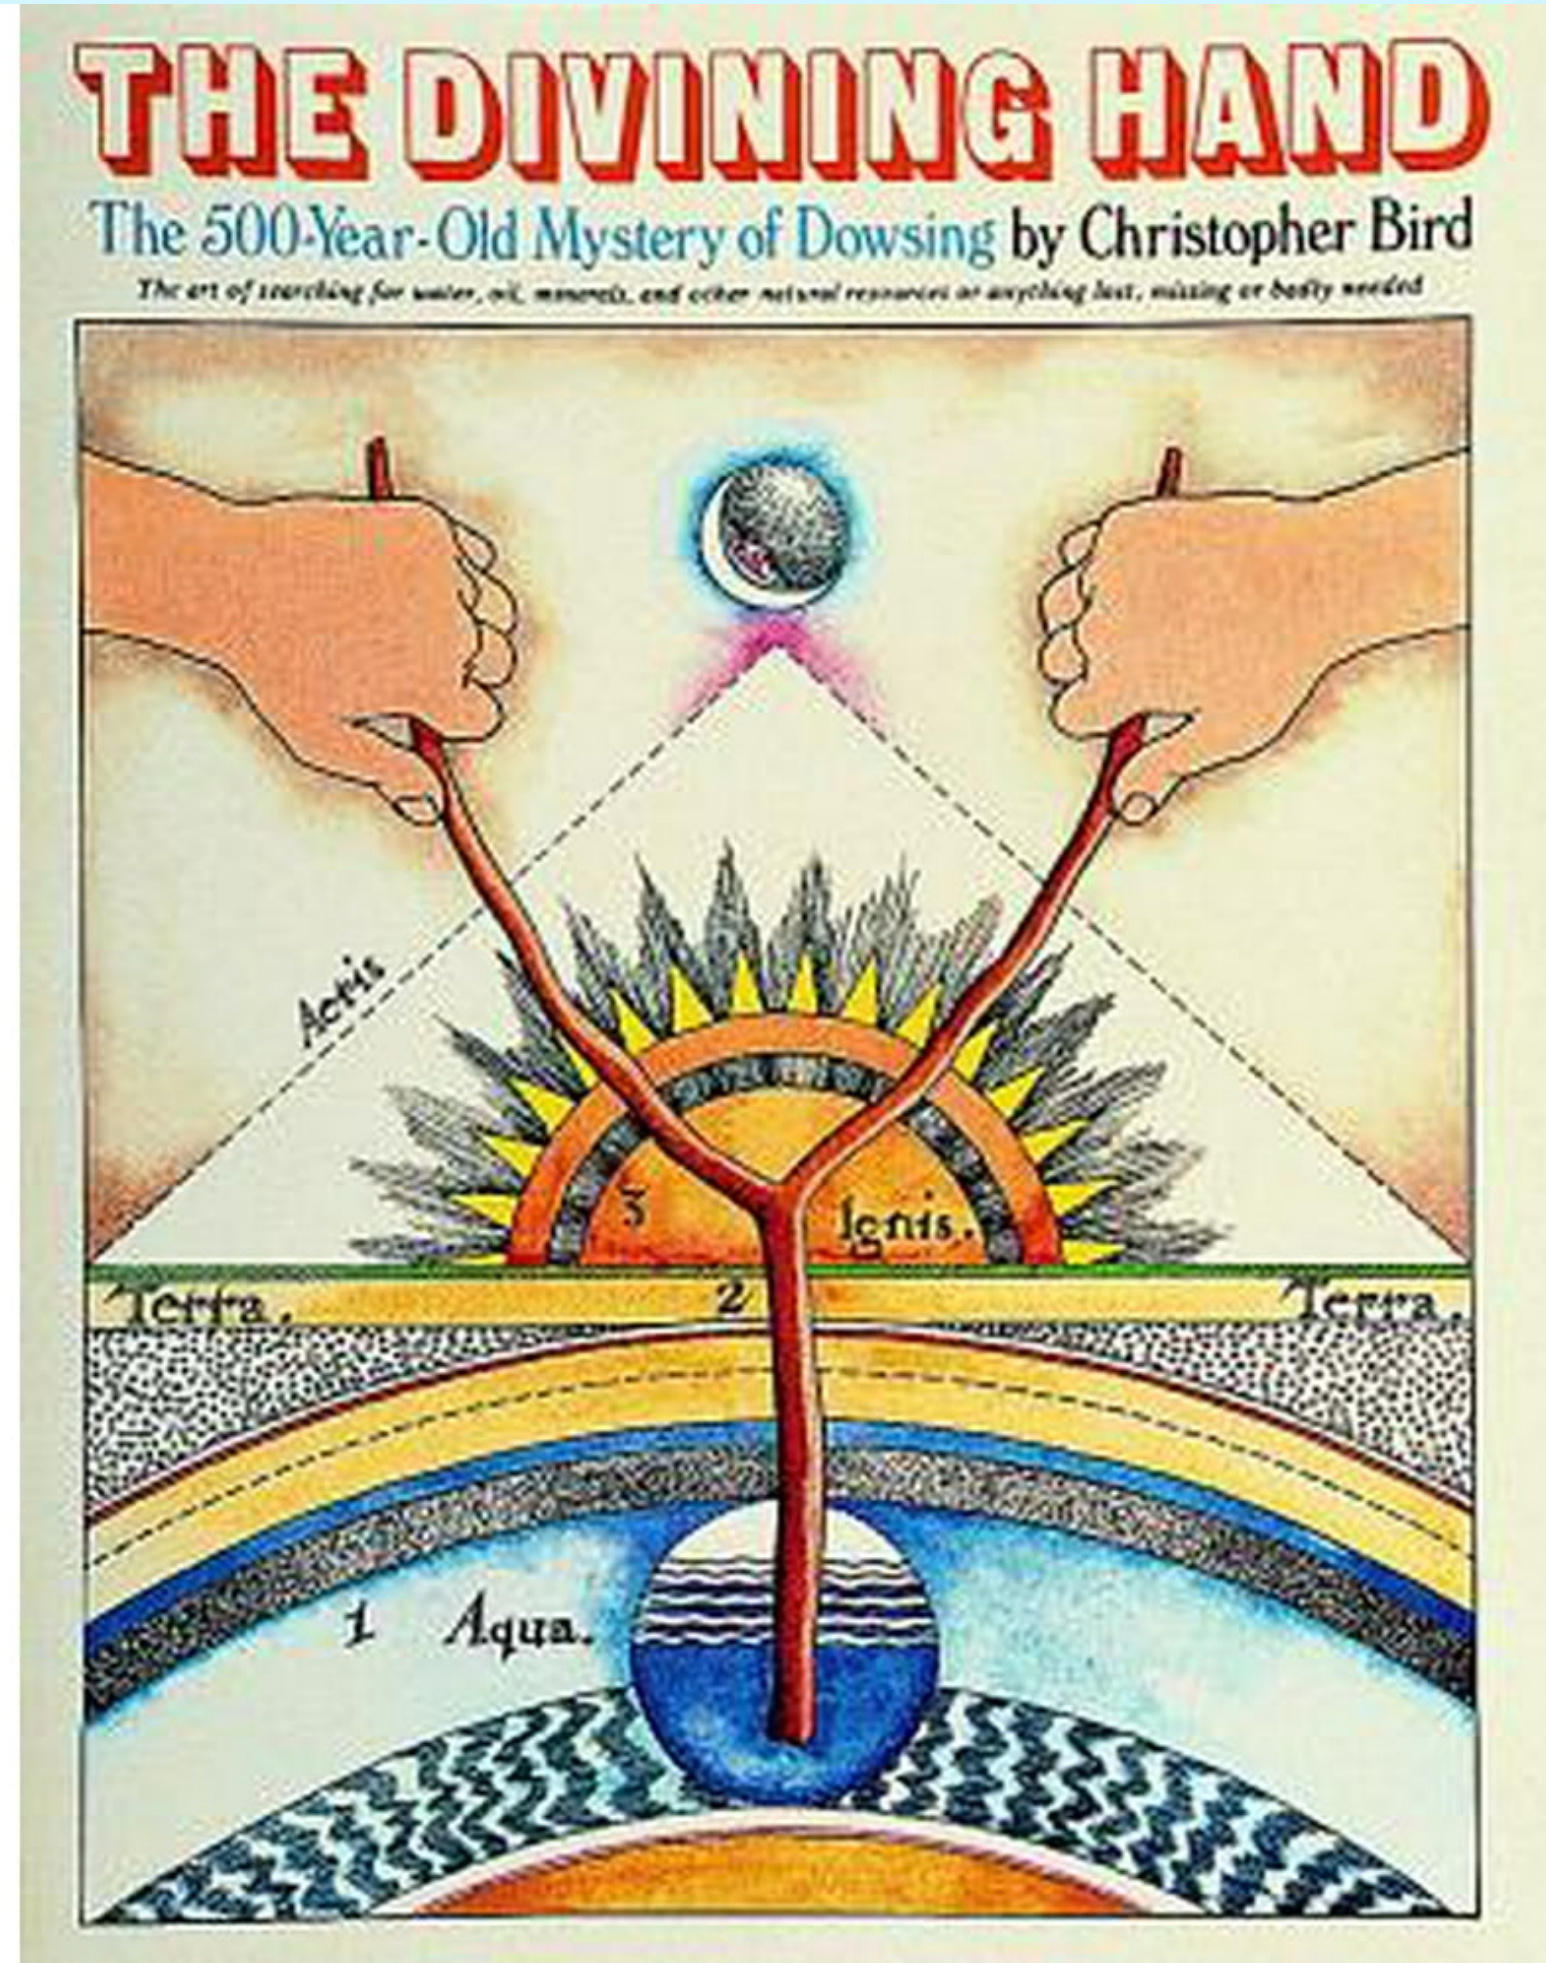

Film and album, 1979

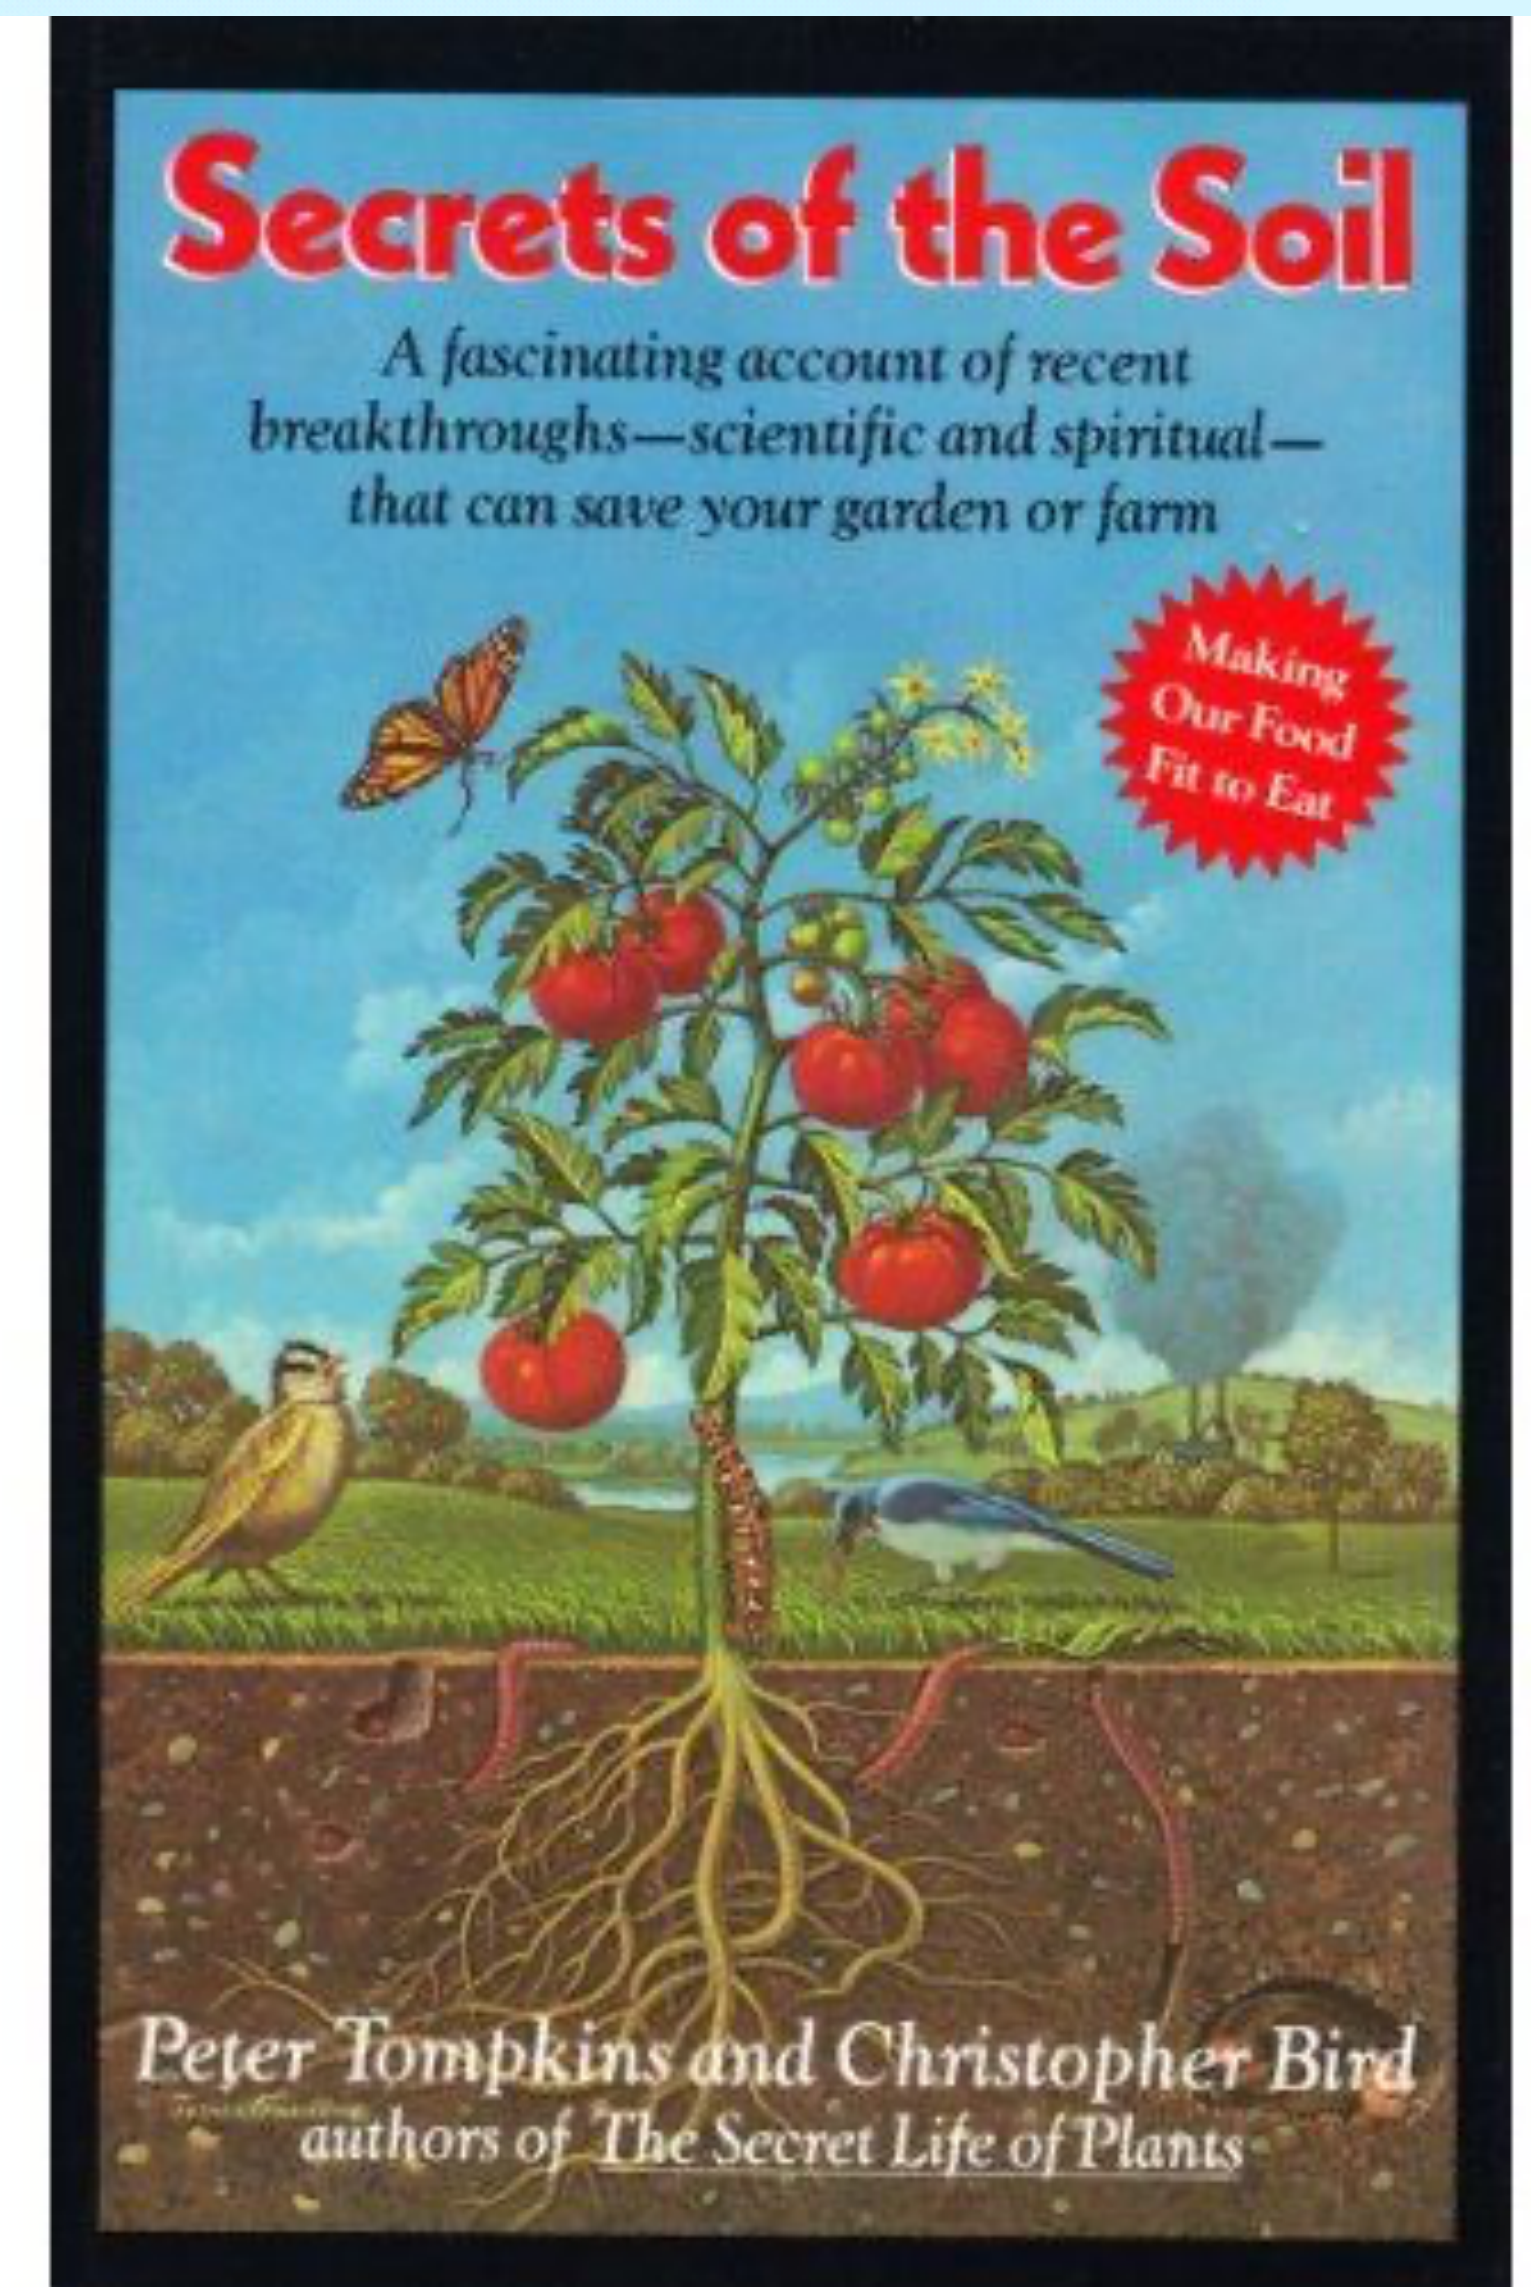

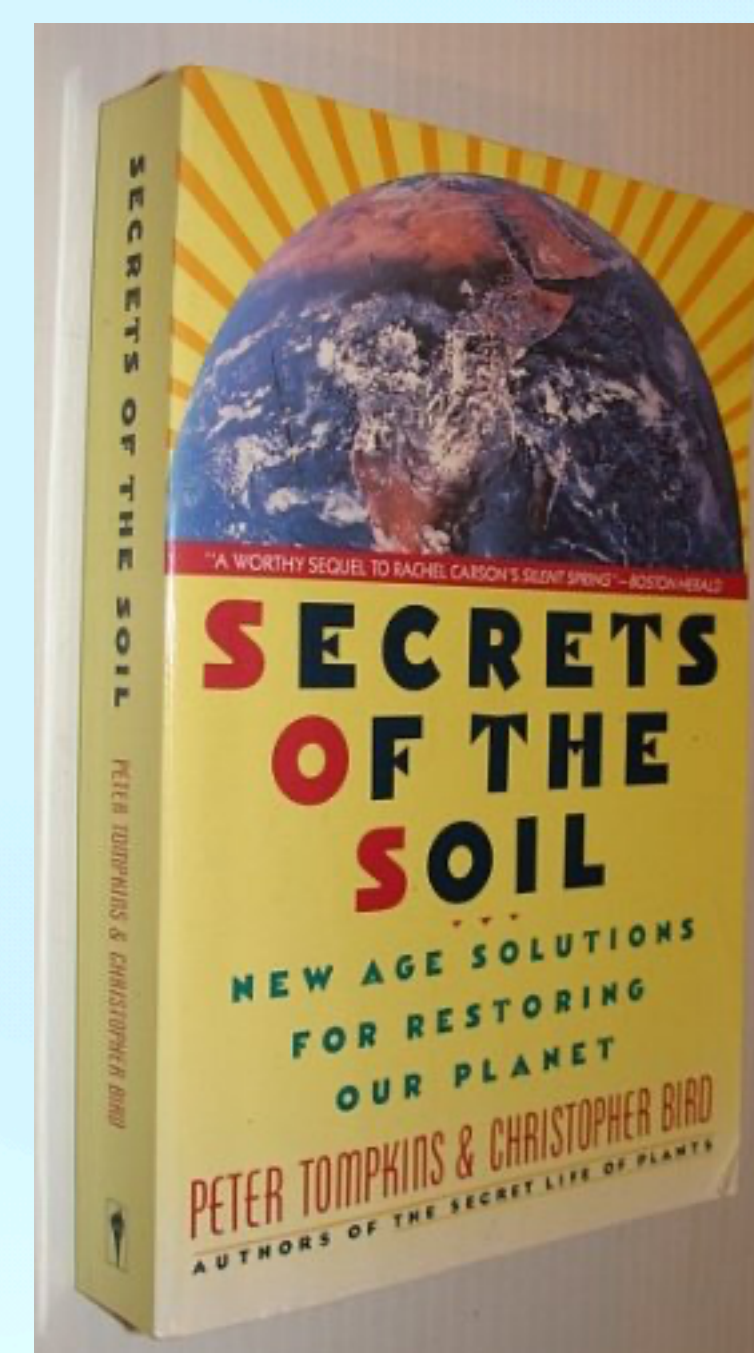

Virginia Beach, Virginia,
1978

4th Mediterranean Plant Conservation Week. Valencia, Spain. October, 2023. Aurelio Penya, Doina Bird

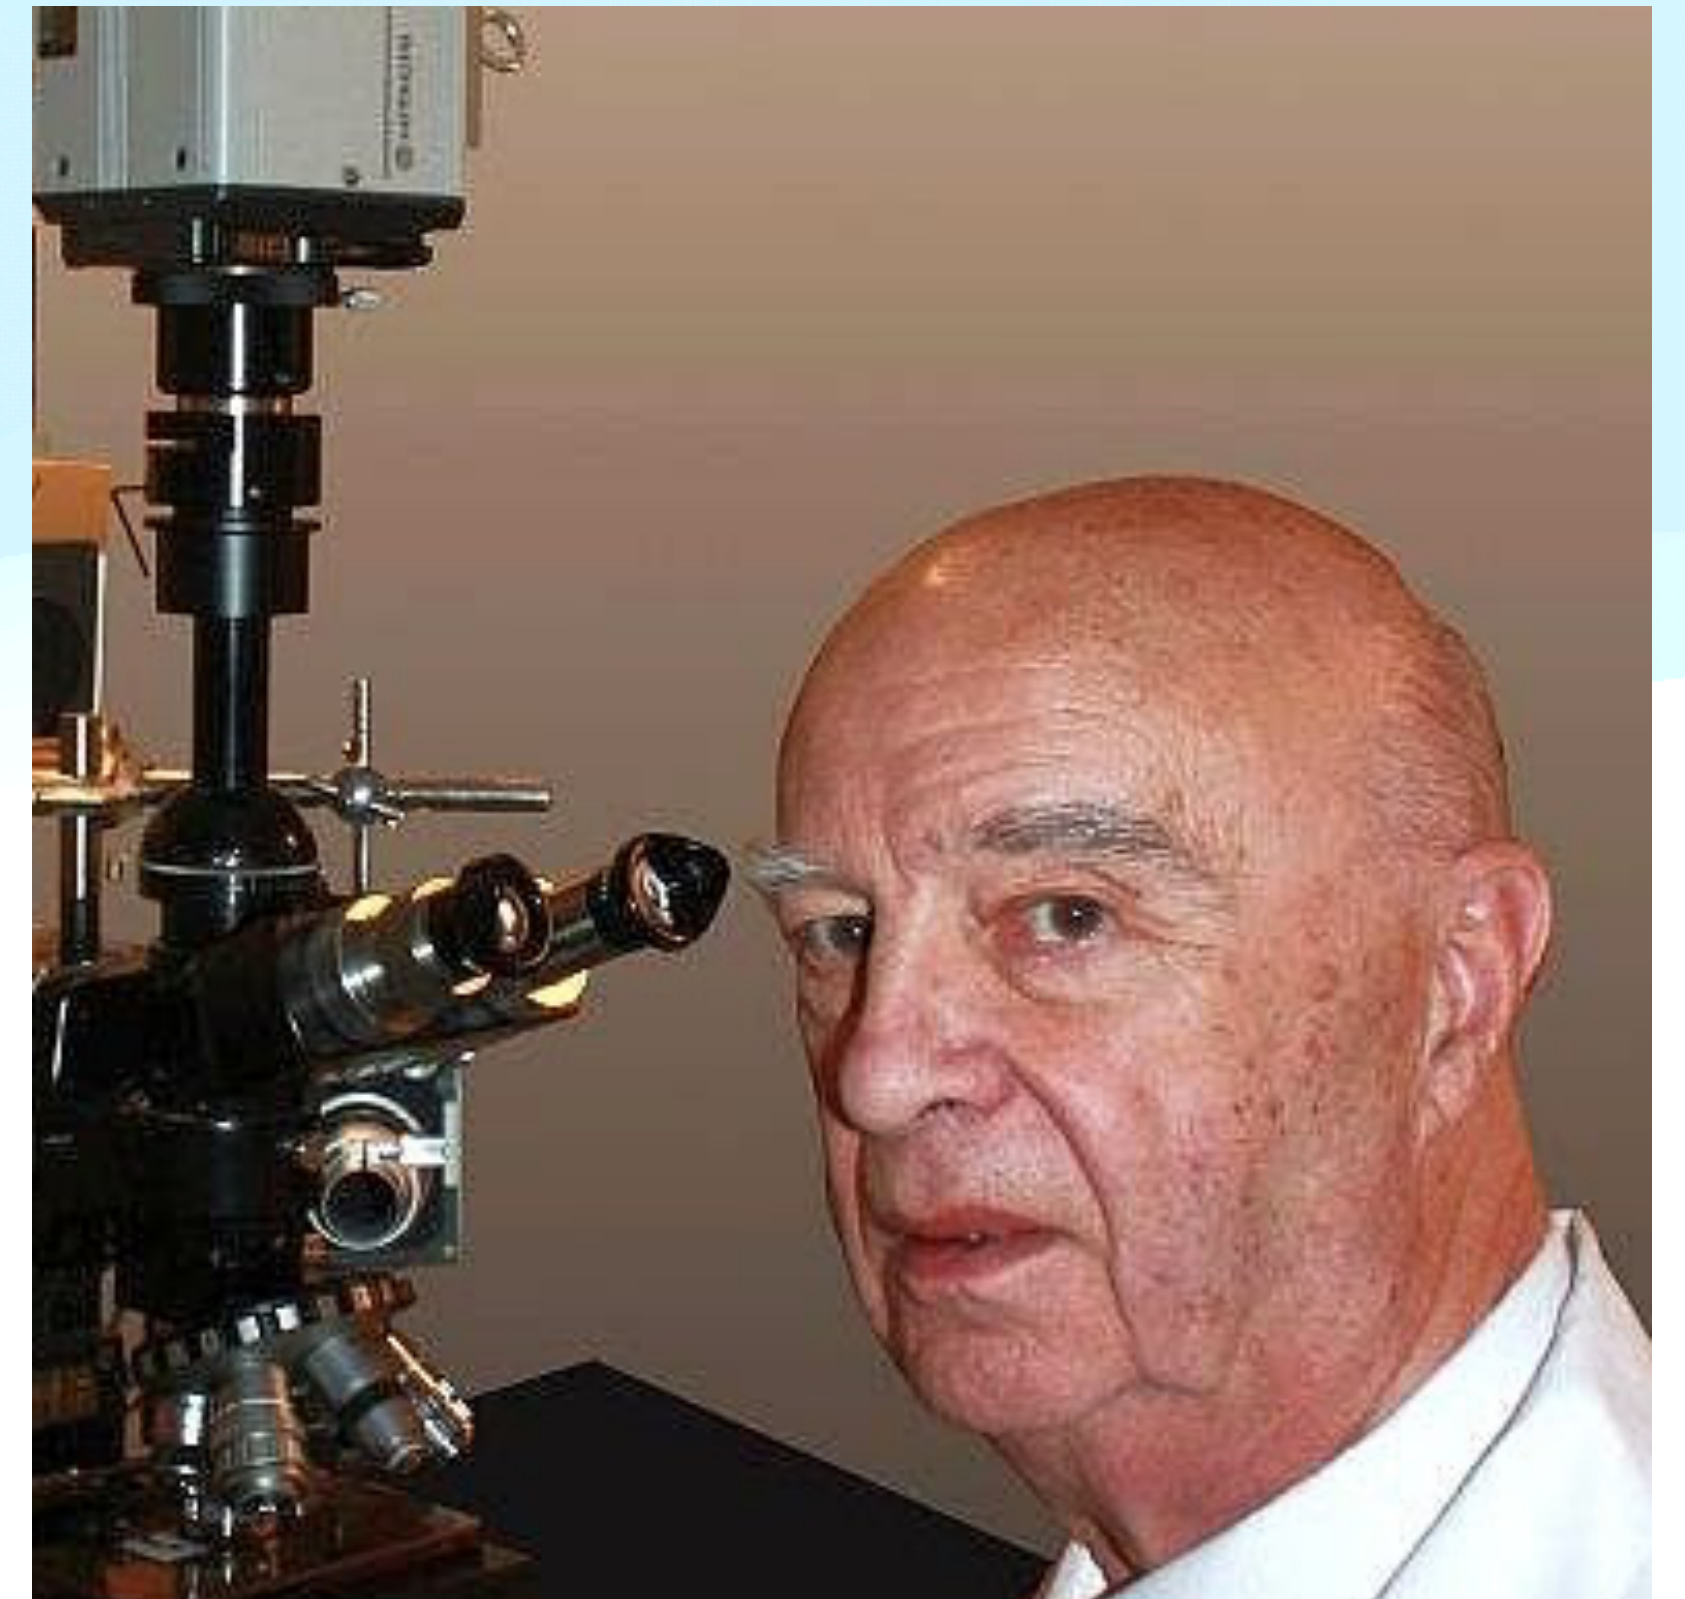

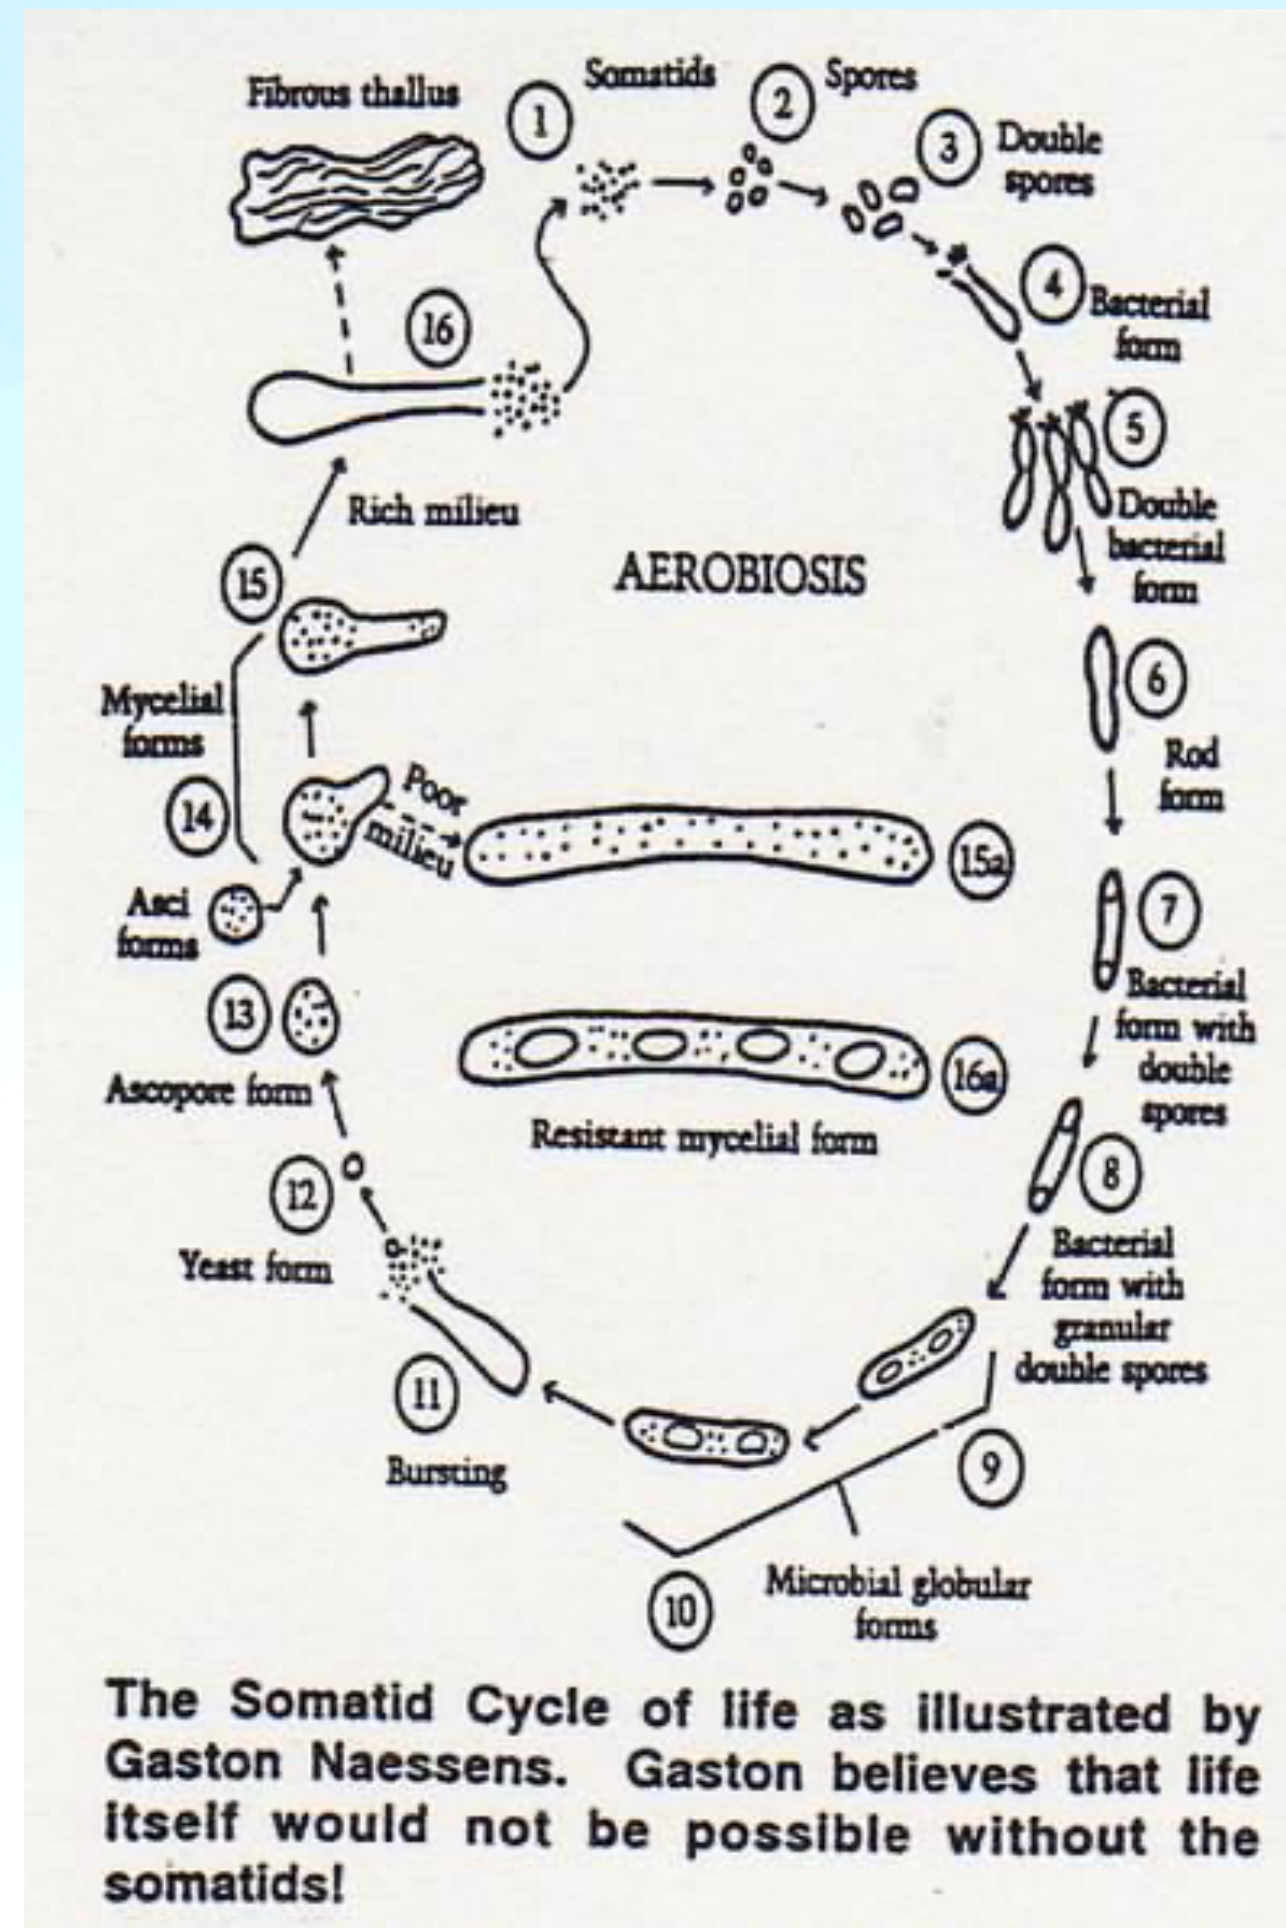

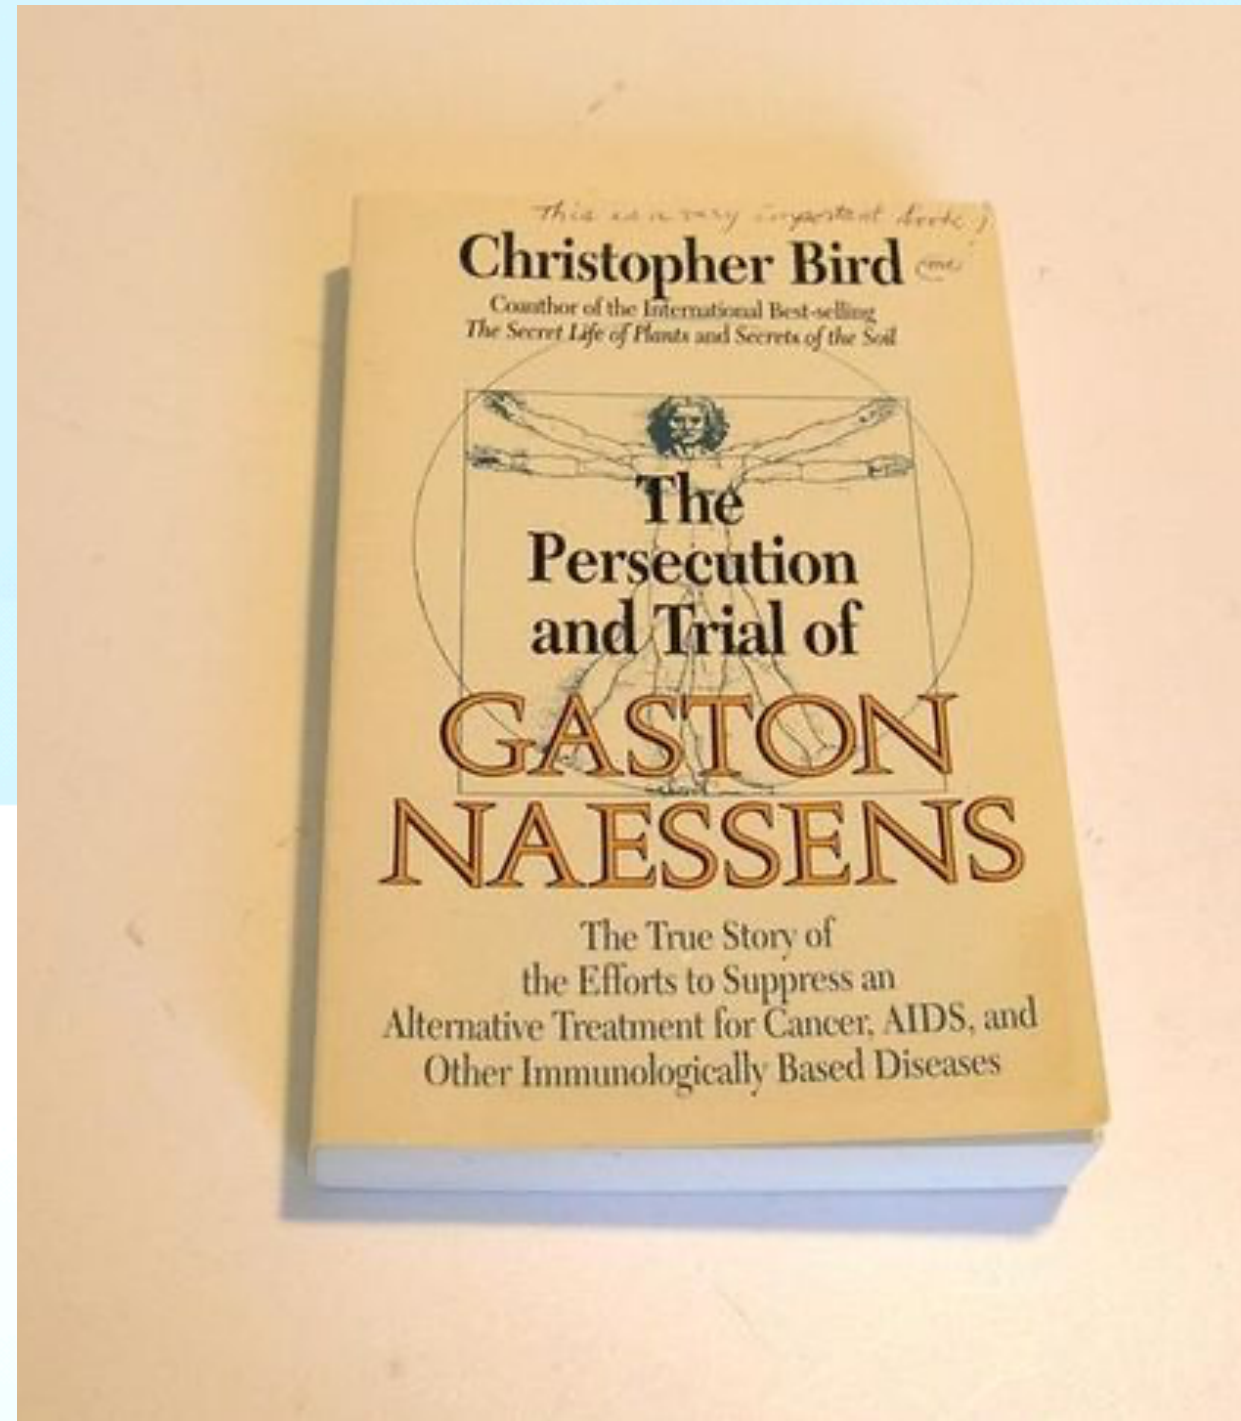

- the science and metaphysics of soil, sustainable agriculture, water and the environment
- the inherent life force in all plants, stones, soil, water and air, weed importance
- our relationship with the soil is vitally important to our future
- compost, earthworms, seeds, Sonic Bloom
- sound, radionics, magnetic rock dust, free energy

As long as one eats food from unhealthy soils, the spirit will lack the resistance to free itself from the prison of the body. — Rudolf Steiner

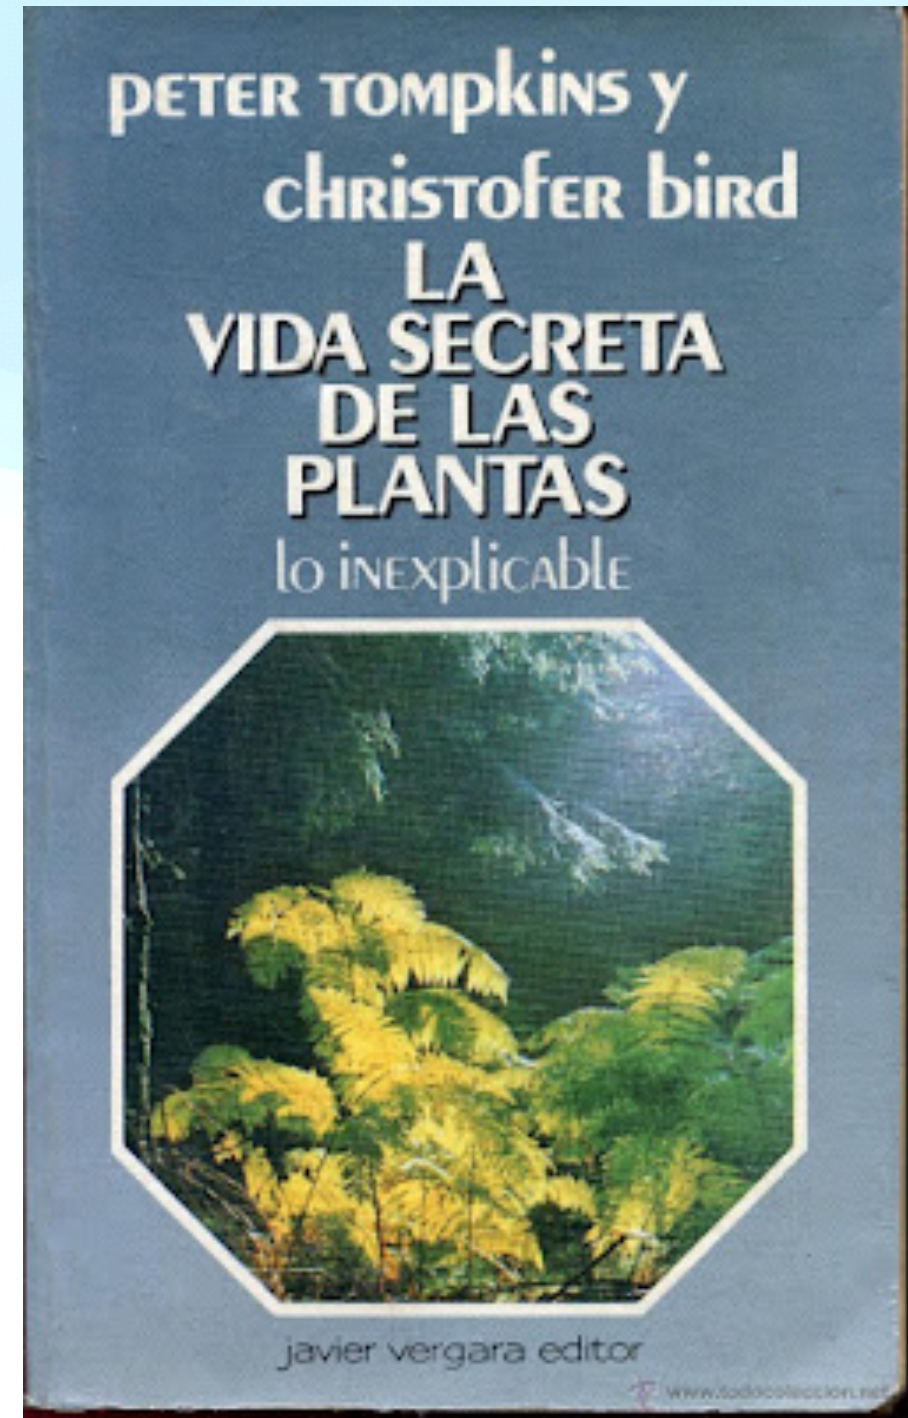

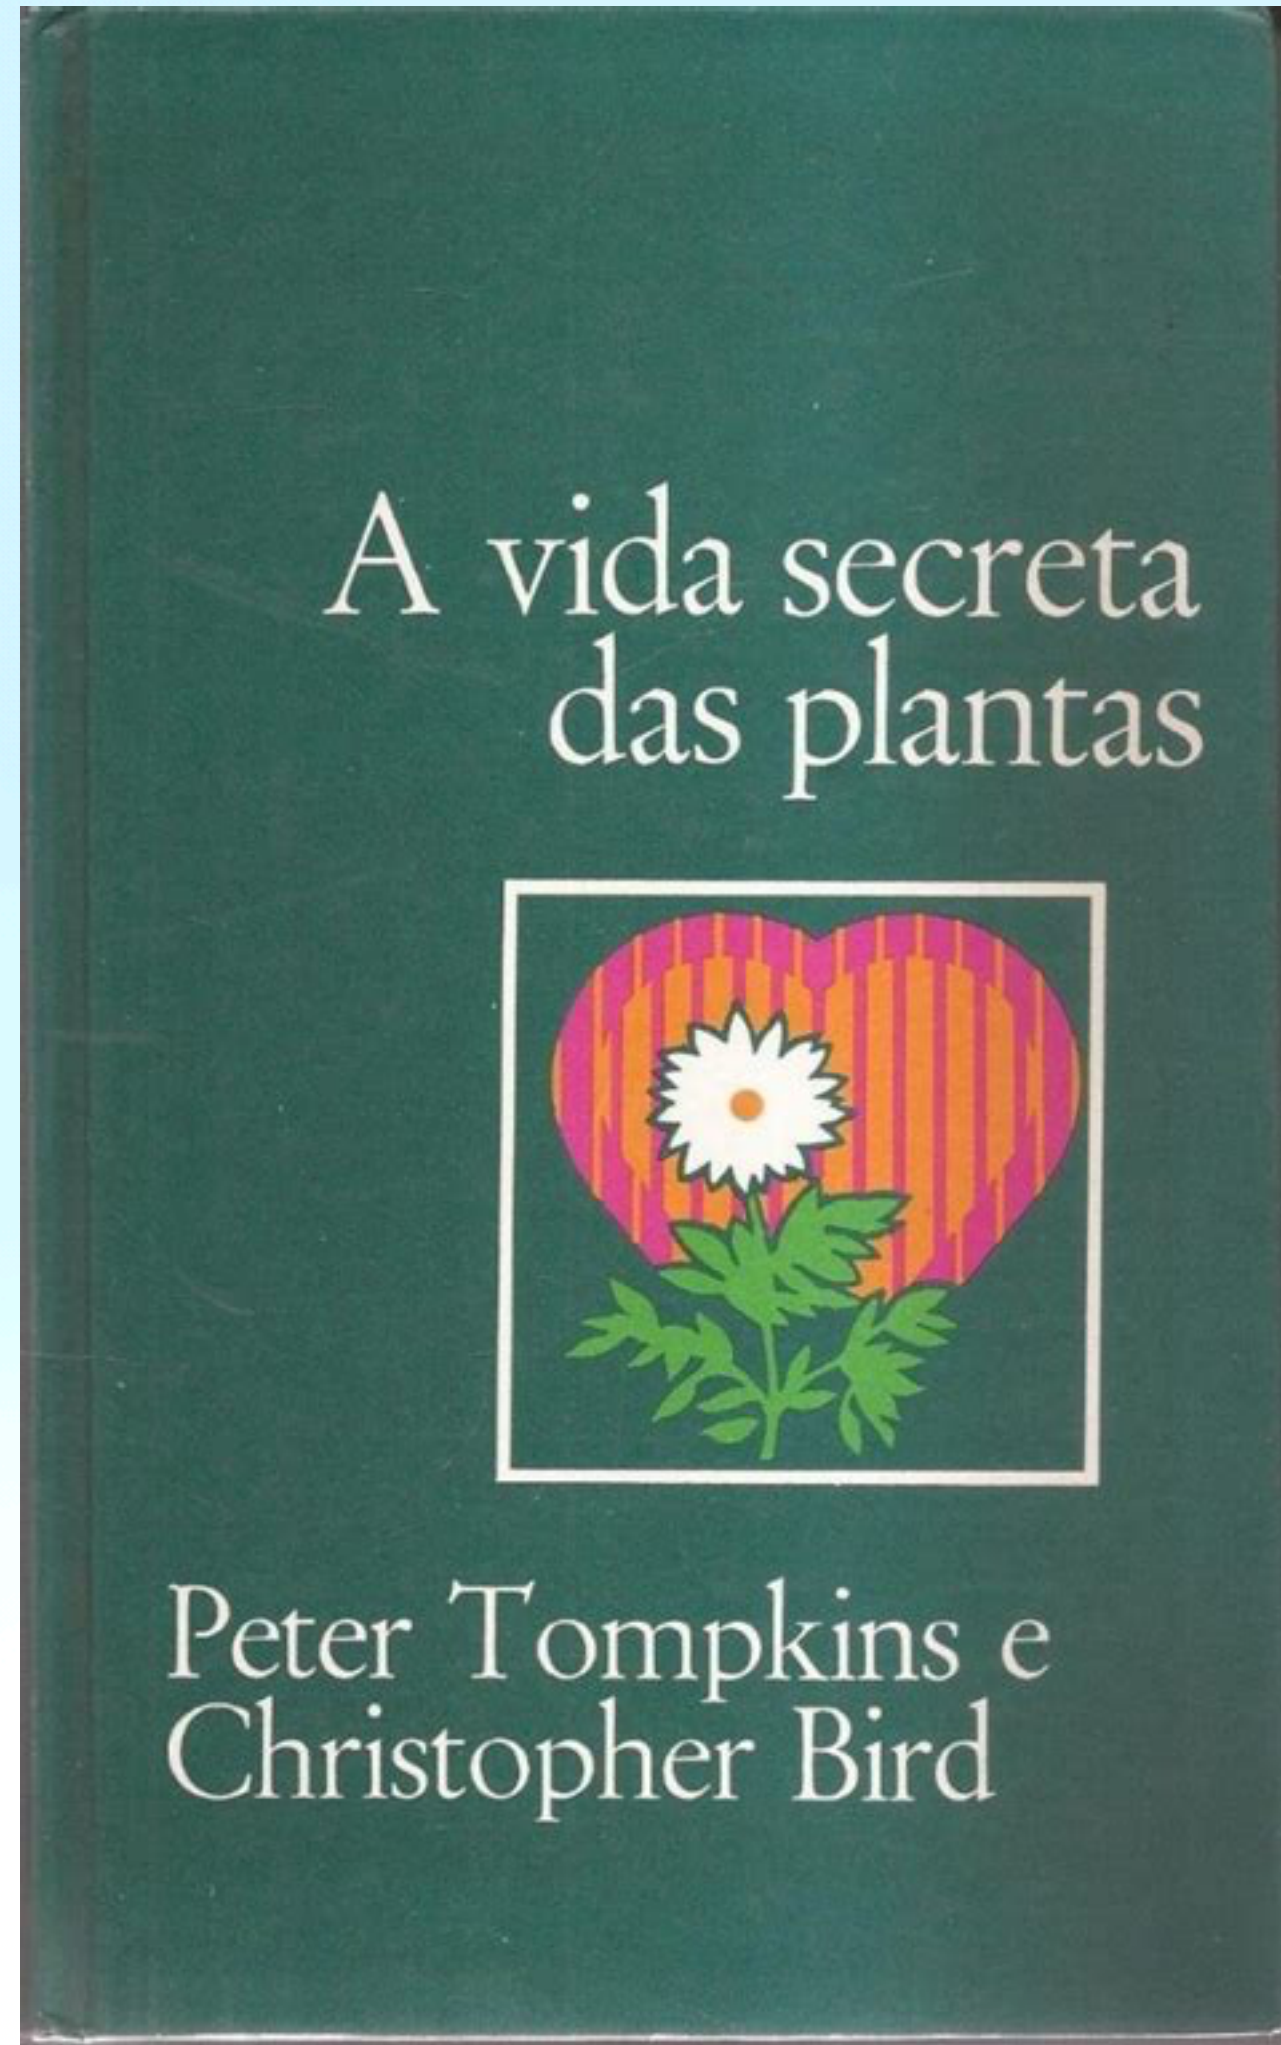

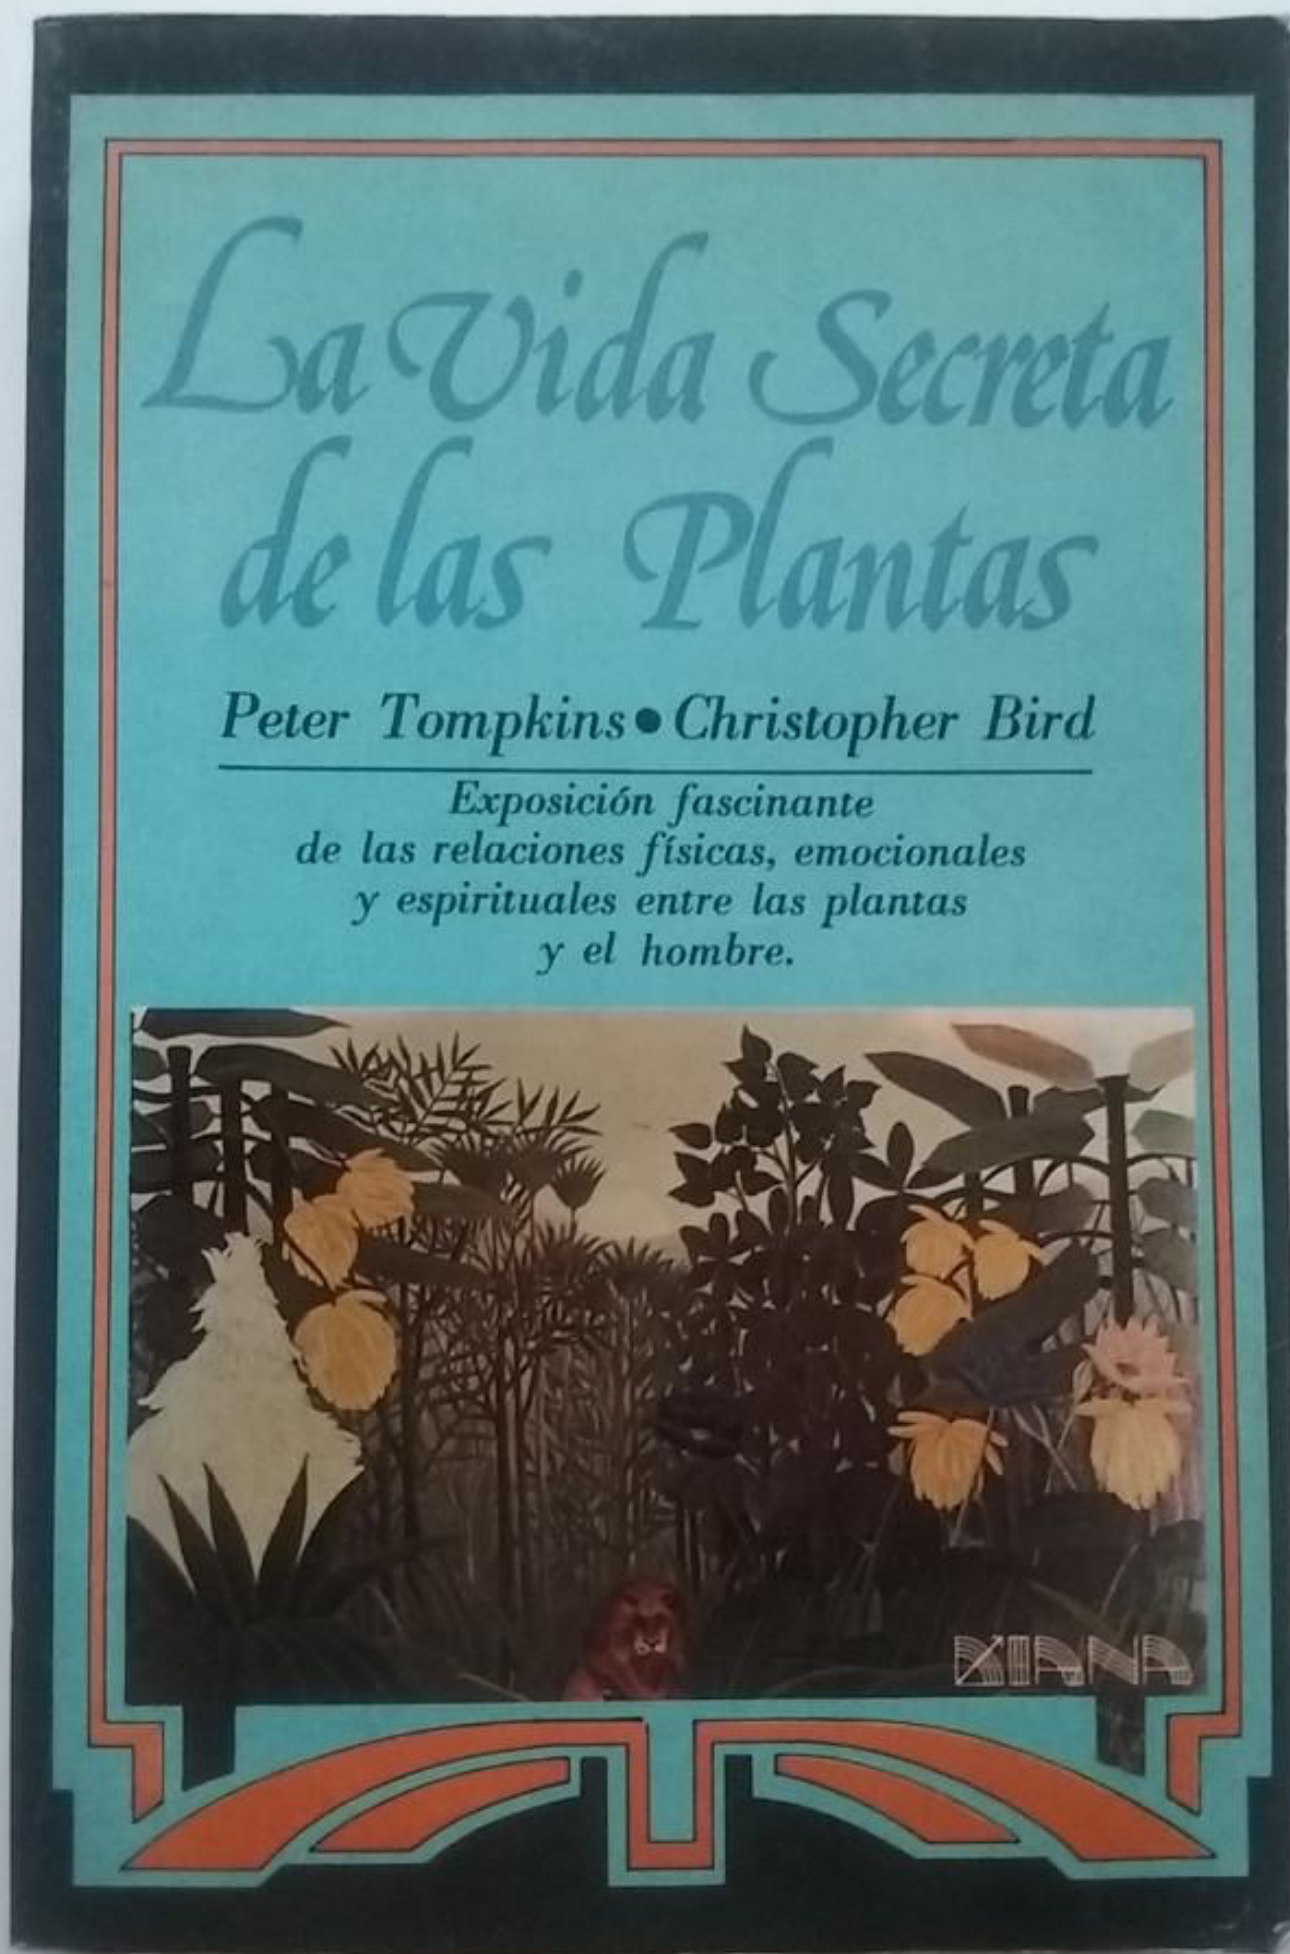

Gaston Naessens (1924-2018)

Somatoscope, the somatid, 714X

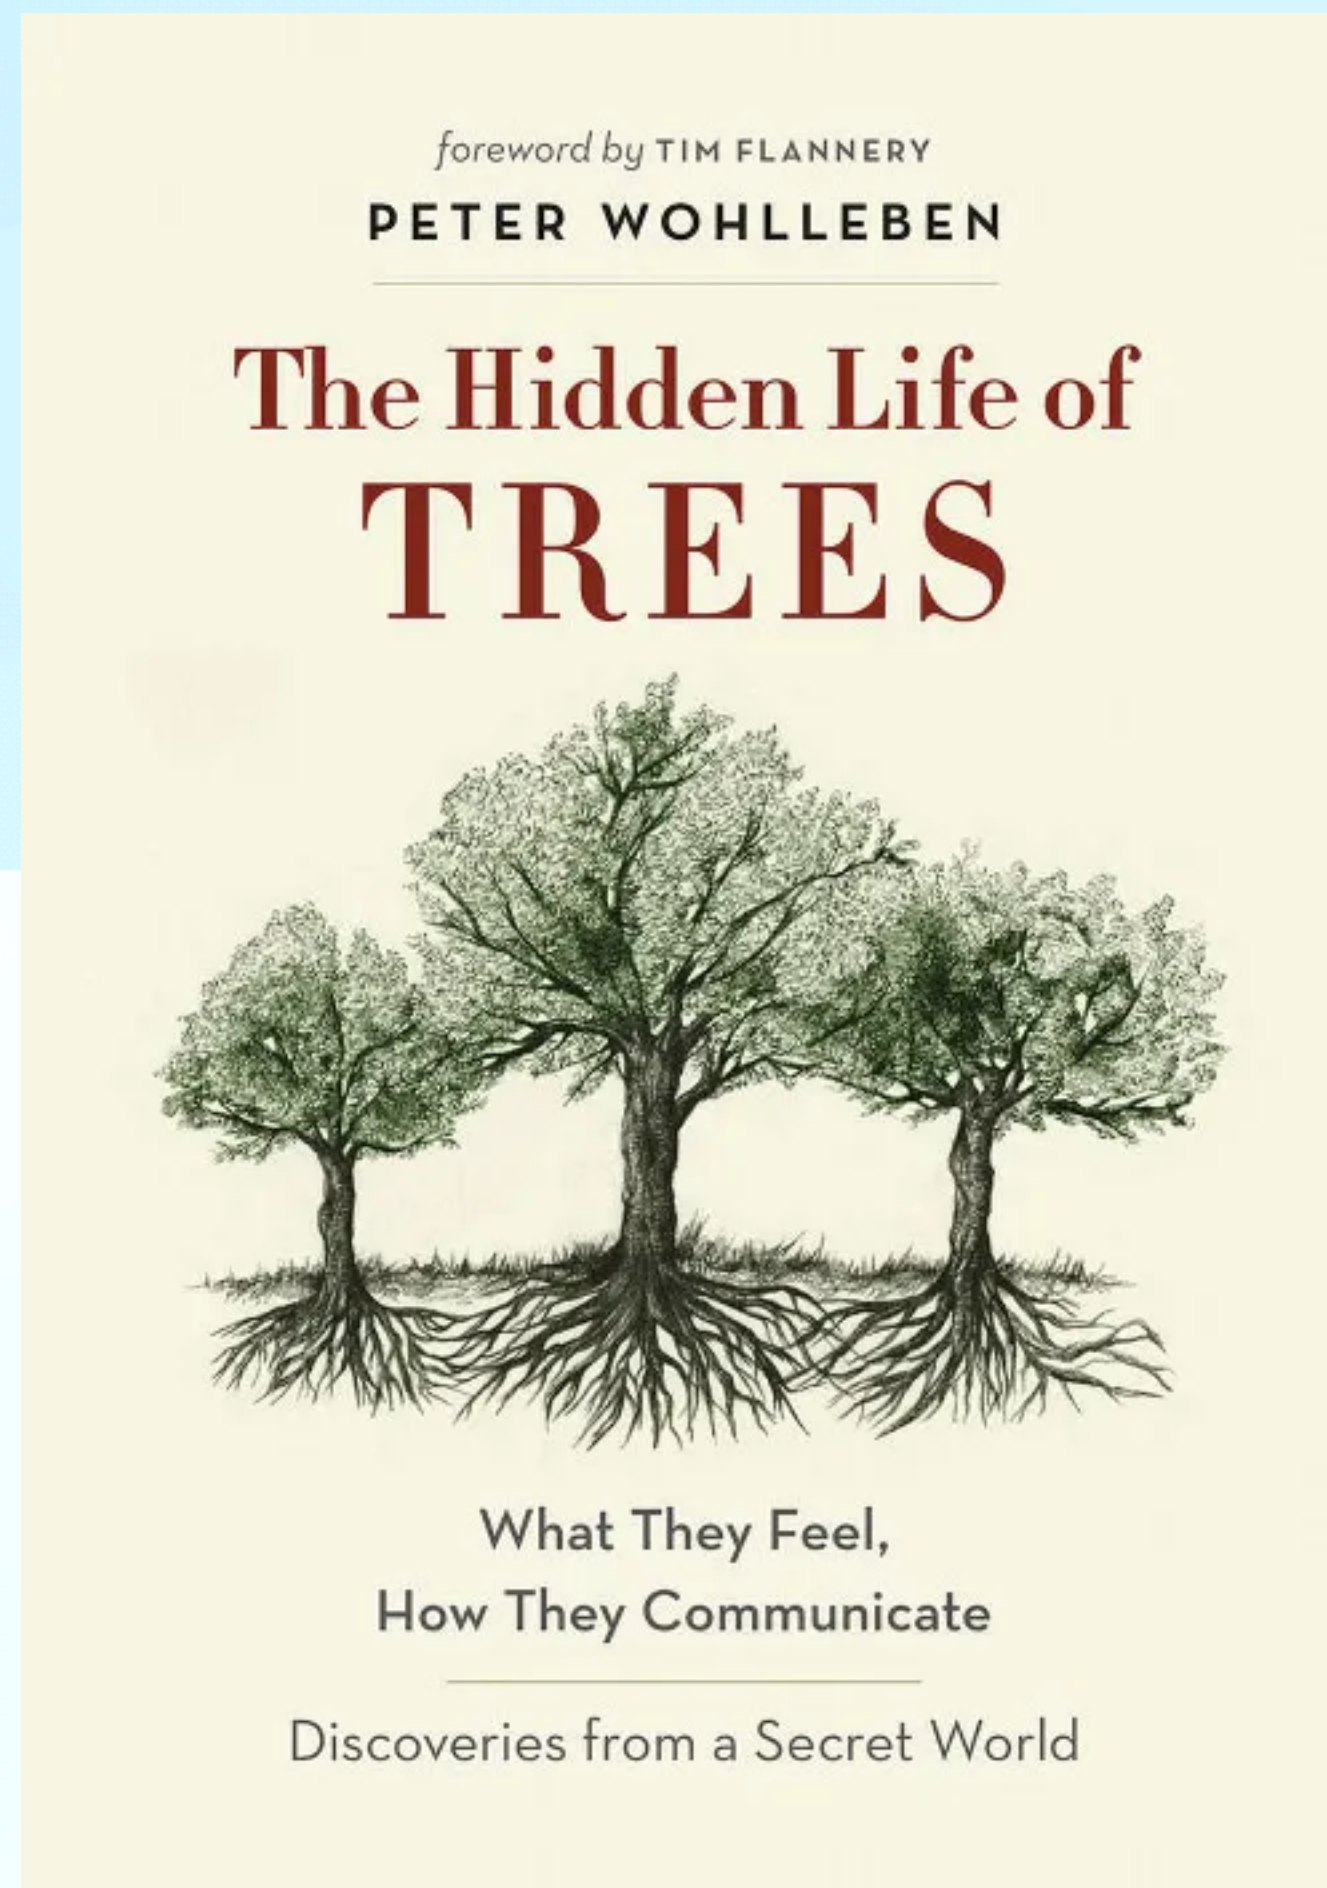

4th Mediterranean Plant Conservation Week. Valencia, Spain. October, 2023. Aurelio Penya, Doina Bird

Conclusions

"At the heart of science lies discovery which involves a change in worldview. Discovery in science is possible only in societies which accord their citizens the freedom to pursue the truth where it may lead and which therefore have respect for different paths to that truth."

-John Polanyi, Canadian Nobel Chemistry prize winner, McGill University graduation speech, Montreal, Canada, 1990

- life force in all organisms
- communication synergies
- silencing the truth for avarice
